It's time to win the race against the clock. From finding a parking spot to getting in a good mood, to falling asleep or thinking on your feet, speed is often at the heart of a better life. The Experts' Guide to Doing Things Faster provides you with straightforward and creative strategies for being more efficient in every aspect of every day—in 100 compact chapters written by 100 of the world's leading experts, including: • Daily essentials, such as getting ready in the morning by Hannah Storm • Lifestyle lessons, such as throwing a dinner party by Colin Cowie and writing thank-you notes by Carlyne Roehm • Beauty basics that include styling your hair by Sally Hershberger and losing weight by Harley Pasternak • Romance road maps, such as making a winning first impression by Neil Strauss • Physical feats that include running faster by Justin Gatlin and relaxing by Rodney Yee • Money matters, such as selling a home by Barbara Corcoran and getting a loan by Sir Richard Branson • Healthy hints, such as speeding up your metabolism by Mark Hyman and overcoming guilt by Keith Ablow Some of these experts are household names, others are industry leaders—all are at the top of their profession. From a two-time Super Bowl winner and survivor of twenty-nine operations ("How to Recover from Surgery") to New York's most famous doorman ("Make Someone Feel Good"), from the founder of the Geek Squad ("Make Your Computer Run Faster") to Las Vegas's premier wedding planner ("Plan a Wedding") and an Olympic eater ("Cure a Stomachache"), they are the authorities on their subjects. Packed with funny, surprising, and incredibly clever advice, The Experts' Guide to Doing Things Faster teaches you how to lead your life more efficiently, leaving you with more time to enjoy its pleasures.

"If a student researcher had only one handbook on their bookshelf, Miller and Salkind's Handbook would certainly have to be it. With the updated material, the addition of the section on ethical issues (which is so well done that I'm recommending it to the departmental representative to the university IRB), and a new Part 4 on "Qualitative Methods", the new Handbook is an indispensable resource for researchers." Dan Cover, Department of Sociology, Furman University The book considered a "necessity" by many social science researchers and their students has been revised and updated while retaining the features that made it so useful. The emphasis in this new edition is on the tools with which graduate students and more advanced researchers need to become familiar as well as be able to use in order to conduct high quality research.

Rule the Room is the product of Jason Teteak's twenty-year experience as a trainer and coach. His thoroughly tested advice covers every presenter's concerns, from hooking the audience immediately to entertaining them, and from overcoming your fears to handling questions. He covers every base—content creation, delivery, audience management— with an overview plus step-by-step instructions, review exercises, and scores of specific and practical tips. Whether you want to persuade, motivate, teach, or inspire, Rule the Room can be your guide.

This book's author, Byron Love, admits proudly to being an IT geek. However, he had found that being an IT geek was limiting his career path and his effectiveness. During a career of more than 31 years, he has made the transition from geek to geek leader. He hopes this book helps other geeks do the same. This book addresses leadership issues in the IT industry to help IT practitioners lead from the lowest level. Unlike other leadership books that provide a one-size-fits-all approach to leadership, this book focuses on the unique challenges that IT practitioners face. IT project managers may manage processes and technologies, but people must be led. The IT industry attracts people who think in logical ways—analytical types who have a propensity to place more emphasis on tasks and technology than on people. This has led to leadership challenges such as poor communication, poor relationship management, and poor stakeholder engagement. Critical IT projects and programs have failed because IT leaders neglect the people component of "people, process, and technology." Communications skills are key to leadership. This book features an in-depth discussion of the communications cycle and emotional intelligence, providing geek leaders with tools to improve their understanding of others and to help others understand them. To transform a geek into a geek leader, this book also discusses: Self-leadership skills so geek leaders know how to lead others by leading themselves first Followership and how to cultivate it among team members How a geek leader's ability to navigate disparate social styles leads to greater credibility and influence Integrating leadership into project management processes The book concludes with a case study to show how to put leadership principles and practices into action and how an IT geek can transform into an effective IT geek leader.

Drawing on the expertise of thirty-seven top experts with a variety of experiences from a wide range of libraries, you will learn how to : assess your library's needs and set realistic training goals ; create and budget for a training infrastructure ; enhance the existing skill set by building on core competencies ; and adapt proven assessment surveys to address specific issues.

In response to the escalating need for up-to-date information on writers, Contemporary Authors® New Revision Series brings researchers the most recent data on the world's most-popular authors. These exciting and unique author profiles are essential to your holdings because sketches are entirely revised and up-to-date, and completely replace the original Contemporary Authors® entries. For your convenience, a soft-cover cumulative index is sent biannually.While Gale strives to replicate print content, some content may not be available due to rights restrictions.Call your Sales Rep for details.

Every dream has to start somewhere! With the shaky economy and unemployment rising, more and more people are trying to find alternative ways to start businesses out of their homes. But what is the right home grown business? What skills are necessary? What will it really cost and how much money will it generate? All these questions and more are answered in 'The Complete Idiot's Guide® to Low-Cost Startups'. - Expert author with over 30 years experience in the area - Ways to determine which business is right for you - and the most effective to start - Great, innovative ideas from hi-tech service to low-tech selling - Practical nuts and bolts advice on starting and running the business - Solid information about costs, financing, taxes and organization
