Electric, Electronic and Control Engineering contains the contributions presented at the 2015 International Conference on Electric, Electronic and Control Engineering (ICEECE 2015, Phuket Island, Thailand, 5-6 March 2015). The book is divided into four main topics: - Electric and Electronic Engineering - Mechanic and Control Engineering - Informati

Volume 5 "THE WORKING CLASS AND ITS CULTURE ' of the American Cities; series. This collection brings together more than 200 scholarly articles pertaining to the history and development of urban life in the United States during the past two centuries. Volume 5 contains articles that are closely related but which concentrate specifically on the changing nature of work in American cities during the past two centuries. While they obviously concern the development of the industrial and post-industrial economies, they also recognize that economic transformations are intimately related to cultural change and that economic and cultural change are inseparable and must be considered together. At the same time, taken as a group, the articles reveal differences in experience between black and white Americans, men and women, and native and foreign-born Americans, necessitating that each of these groups be considered separately. The selections also investigate and illuminate questions about the relationships among these different groups and the kinds of actions they have taken to achieve their goals—political protests, boycotts, strikes, and so on.

Humanistic geography now has an established position in the intellectual development of contemporary geography. However there has so far been little attempt to draw together the humanistic approach in one broad statement. This book by the leading figures in the field provides a platform for the exposition of humanistic geography in all its aspects.

This book illuminates the profound influence of geography on everyday life. Concentrating on the realm of social reproduction – gender, family, education, culture and tradition, race, ethnicity the contributors provide both an articulation of a theory of territory and reproduction and concrete empirical analyses of the evolution of social practices in particular places. At the core of the book ' s contribution is the concept of society as a ' time-space ' fabric, upon which are engraved the processes of political, economic and socio-cultural life. A second distinctive feature of the book is its substantive focus on the relation between territory and social practice. Thirdly, it represents a significant step in the redefinition of the research agenda in human geography.
