Gerontological nursing : competencies for care (Book, 2014 ...

Covering both disorders and wellness, Gerontologic Nursing provides the essential information you need to provide the best nursing care to older adults. A body-system organization makes information easy to find, and discussions include health promotion, psychologic and sociocultural issues, and the common medical-surgical problems associated with aging adults.

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Gerontological Nursing: Competencies for Care, Fourth Edition focuses on caring for the elderly by employing a holistic and inter-disciplinary approach. The Fourth Edition will feature a greater emphasis on healthy aging and continues to follow the framework of the Core Competencies of the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. This framework allows students to learn and develop all aspects of nursing care in a familiar and structured learning platform.

Gerontological Nursing: Competencies for Care, Fourth Edition focuses on caring for the elderly by

employing a holistic and inter-disciplinary approach. The Fourth Edition will feature a greater emphasis on healthy aging and continues to follow the framework of the Core Competencies of the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Public Health Nursing: Practicing Population-Based Care explores the scientific discipline of public health and in particular public health nursing. This public health nursing perspective is applied throughout the chapters and demonstrates how public health nurses use various interventions based on best evidence in their practice, both to protect and enhance the health of the public. This innovative text includes key topics such as a discussion of historical evidence in coming to know the meaning of the terms used to describe public health nursing; the exploration of the use of technology in public health; social epidemiology as well as the traditional content on epidemiology; and an innovatively designed assessment tool that uses Healthy People 2010, A Systematic Approach to Health Improvement, as its framework. The highlight of this text is the focus on the 17 intervention strategies identified in the Population-Based Public Health Nursing Practice Intervention Wheel including a discussion of how these interventions may be applied to the three levels of practice: individual/family, community, and systems.

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

GERONTOLOGIC NURSING provides comprehensive coverage of health promotion, gerontologic concepts and issues, and medical-surgical problems associated with the older adult. Divided into seven parts, each chapter follows a consistent organization including learning objectives, emergency boxes, client and family teaching boxes, research boxes, key points, special insights, and new health promotion and nutrition boxes. The second edition also includes a new chapter on health promotion, expanded chapters on nutrition and functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client. Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client. Integrates Insight boxes that provide realistic vignettes on caring for the elderly and helpful hints from today's practicing gerontological nurses. Provides Emergency Treatment boxes that alert the student to danger signs and list immediate interventions. Includes research boxes with abstracts of current research and implications for practice. Provides a nuts-and-bolts guide to blood-product administration for adult and pediatric patients. Outlines and explains transfusion reactions. Describes the effect of different types of fluids used in resuscitation. Includes formulas used in fluid administration. Provides the most up-to-date information about oxygen delivery devices. Presents information on how to help a Spanish-speaking child identify his/her level of pain. Includes the pediatric coma scale. Features the pediatric trauma score which is used to help evaluate the severity of injury. Provides information about domestic violence in the Mental Health Conditions chapter. Includes a section on the role of the Sexual Assault Nurse Examiner (SANE) and the latest findings on sexual assault. Presents additional information on mammalian bites and anaphylactic shock. Highlights major points of care for quick reference with bold or italicized text. Presents pediatric and adult content separately in the reference section of the book for fast and easy access. Includes stroke and hypothermia algorithms. Covers the latest information on conscious sedation according to JCAHO standards, including a table on deep sedation. Features several new and updated tables which include the following information: conversion of Centigrade and Fahrenheit, updated normal lab values, updated medication tables, etc. (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Lueckenotte/)

The book is designed to be used throughout the undergraduate nursing curriculum, as well as in traditional community health nursing theory and clinical courses. Ideal courses include Community Health Nursing, Nursing Care III, Nursing Care of the Community, Community Nursing Clinical, and Community

Nursing Theory.

Designed to be a student-friendly textbook for faith-based schools, this first edition text focuses on nursing as ministry, not just spiritual care.

NUTRITION, EXERCISE, AND BEHAVIOR: AN INTEGRATED APPROACH TO WEIGHT MANAGEMENT is designed for students and professionals in a variety of disciplines who need to understand the basic principles of weight management. It incorporates a multifaceted, public health approach to issues of weight management examining not only individual factors, but societal, family, and environmental factors contributing to eating disorders and overweight/obesity. The text includes detailed coverage of assessment techniques, behavioral and non-behavioral treatment approaches, and prevention strategies. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Fundamentals of Medical-Surgical Nursing: a Systems Approach is a comprehensive yet easy-to-read overview of medical and surgical nursing, designed specifically to support all nursing students learning to care for the adult patient. Highly illustrated and with an easy-to-follow systems-based structure, it provides a thorough foundation in anatomy and physiology, pathophysiology, medical management, and nursing care for the full spectrum of adult health conditions. Key features include: Extensive coverage of principles of nursing assessment, medication administration, infection prevention and control, and nutritional care Key need-to-know-information and definitions for the anatomy, physiology, and pathology of a range of illnesses and conditions Detailed overviews of nursing care, including patient education, treatment, and complications An online resource centre with a range of extras for both lecturers and students, including case studies, reflective activities, interactive multiple choice questions, and further reading lists Fundamentals of Medical-Surgical Nursing: a Systems Approach is the ideal textbook to help students succeed on their adult nursing course. It is also available: as a Wiley E-Text, powered by VitalSource: an interactive digital version of the book featuring downloadable text and images, highlighting and note-taking facilities, book-marking, cross-referencing, in-text searching, and linking to references and glossary terms. instantly on CourseSmart at <http://www.coursesmart.co.uk/9780470658239>. CourseSmart offers extra functionality, as well as an immediate way to review the text. For more details, visit www.coursesmart.com/instructors or www.coursesmart.com/students.
