The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In *International Studies: Global Forces, Interactions, and Tensions*, award-winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors—forces, interactions, and tensions—contribute to world events, with both global and local consequences. The authors first show students how to look for common patterns in global issues by introducing four world-shaping forces: global markets, shifting centers of power, information and communications technologies, and global governance. They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves—Who is interacting? Where did such interactions develop? What policies or institutions

govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics and global health responses, climate change, food security, and more. International Studies raises the bar for the Introduction to IS course, moving beyond interdisciplinary, and into the realm of critical analysis to increase student relevancy and motivation. This attractive, full-colour coursebook covers the seven topics of the Higher Level extension (HL) syllabus in Geography for the International Baccalaureate (IB) Diploma. It explores the HL theme, Global Interactions, emphasising the various scales at which issues can be studied, and identifying and carefully explaining key global issues. The coursebook guides students through the HL syllabus, building geographical skills and making connections to other areas of the Geography course and to concepts in the Theory of Knowledge. It also encourages detailed study of primary and secondary sources, developing students' analytical skills. The content is tailored to the requirements and assessment objectives of the IB syllabus, making it relevant to the way in which the subject is taught, assessed and examined.

A new edition of a book that takes a comprehensive look at the ways economic processes affect global environmental outcomes. This comprehensive and accessible book fills the need for a political economy view of global environmental politics, focusing on the ways international economic processes affect environmental outcomes. It examines the main actors and forces shaping global environmental management, particularly in the developing world. Moving beyond the usual emphasis on international agreements and institutions, it strives to capture not only academic theoretical debates but also views on politics, economics, and the environment within the halls of global conferences, on the streets during antiglobalization protests, and in the boardrooms of international agencies, nongovernmental organizations, and industry associations. The book maps out an original typology of four contrasting worldviews of environmental change—those of market liberals, institutionalists, bioenvironmentalists, and social greens—and uses them as a framework to examine the links between the global political economy and ecological change. This typology provides a common language for students, instructors, and scholars to discuss the issues across the classical social science divisions. The second edition of this popular text has been thoroughly revised and updated to reflect recent events, including the food crisis of 2007-2008, the financial

meltdown of 2008, and the Copenhagen Climate Conference of 2009. Topics covered include the environmental implications of globalization; wealth, poverty, and consumption; global trade; transnational corporations; and multilateral and private finance.

The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In *International Studies: Global Forces, Interactions, and Tensions*, award-winning scholars Scott Straus and Barry Driscoll introduce students to the foundations of the course; the major actors, institutions and theories; as well as the contemporary problems that will matter most to students. In the fully updated Second Edition, the authors give students a clear framework that pinpoints how key factors—forces, interactions, and tensions—contribute to current world events and global problems like human rights abuses, economic inequality, pandemic and global health responses, and food security. The book raises the bar for the Introduction to International Studies course and is relevant to students from a wide variety of backgrounds with diverse interests in geography, sociology, political science, and anthropology. scientific research with agent-based models, focusing on the adaptive behaviors that make these models necessary. They cover the fundamentals of modeling and model analysis, introduce key modeling concepts, and demonstrate how to implement them using NetLogo. They also address pattern-oriented modeling, an invaluable strategy for modeling real-world problems and developing theory. This accessible and authoritative book focuses on modeling as a tool for understanding real complex systems. It explains how to pose a specific question, use observations from actual systems to design models, write and test software, and more. A hands-on introduction that guides students from conceptual design to computer implementation to analysis Filled with new examples and exercises and compatible with the latest version of NetLogo Ideal for students and researchers across the natural and social sciences Written by two leading practitioners Supported by extensive instructional materials at www.railsback-grimm-abm-book.com

Paul J. Vanderwood offers a fascinating look at the events, beliefs, and circumstances that have motivated popular devotion to Juan Soldado, a Mexican folk saint. In his mortal incarnation, Juan Soldado was Juan Castillo Morales, a twenty-four-year-old soldier convicted of and quickly executed for the rape and murder of eight-year-old Olga Camacho in Tijuana in 1938. Immediately after Morales' death, many people began to doubt the evidence of his guilt, or at least the justice of his brutal execution. People reported seeing blood seeping from his grave and hearing his soul cry out protesting his innocence. Soon the "martyred" Morales was known as Juan Soldado, or John the Soldier. Believing that those who have died unjustly sit closest to God, people began visiting Morales' grave asking for favors. Within months of his death, the young soldier had become a popular saint. He is not recognized by the Catholic Church, yet thousands of people have made pilgrimages to his gravesite. While Juan Soldado is well known in

Tijuana, southern California ' s Mexican American community, and beyond, this book is the first to situate his story within a broader exploration of how and why popular canonizations such as his take root and flourish. In addition to conducting extensive archival research, Vanderwood interviewed central actors in the events of 1938, including Olga Camacho ' s mother, citizens who rioted to demand Morales ' s release to a lynch mob, those who witnessed his execution, and some of the earliest believers in his miraculous powers. Vanderwood also interviewed many present-day visitors to the shrine at Morales ' s grave. He describes them, their petitions—for favors such as health, a good marriage, or safe passage into the United States—and how they reconcile their belief in Juan Soldado with their Catholicism. Vanderwood puts the events of 1938 within the context of Depression-era Tijuana and he locates people ' s devotion, then and now, within the history of extra-institutional religious activity. In *Juan Soldado*, a gripping true-crime mystery opens up into a much larger and more elusive mystery of faith and belief.
