Published July 2020. The repercussions of the coronavirus pandemic continue to be felt across the petrochemicals industry, with the global economy facing greater uncertainty than at any time in living memory. As the industry moves into H2 2020, renewed lockdowns, prolonged recessions and the ongoing pandemic present a bleak general outlook. However, the detailed picture is far from clear-cut across the various different petrochemical markets.

Global petrochemical trends: H2 2020 | S&P Global Platts

Global petrochemical outlook H1 2020. The key 2019 themes of burgeoning production capacity and US-China trade tensions echoing across global petrochemicals market will persist into the first-half of 2020, tilting the supply/demand balance and shifting trade flow patterns. New Chinese refinery capacity that came online during 2019 set a bearish tone for aromatics prices, squeezing margins across the board from mixed xylenes and down the chain to styrene monomer.

Global petrochemical outlook H1 2020 | S&P Platts Insight

Aug. 14 2019 — The global petrochemical industry is heading into the second half of 2019 caught in a whirlwind of volatile crude oil prices, ongoing trade disputes and geopolitical tensions. International upheaval has shaped trade flows and price movements in the first half

of the year alongside another major trend – the rise of new petrochemical plants as additions to upstream refineries ...

### Global petrochemical outlook: H2 2019 | S&P Global

The European and Asian polyethylene terephthalate and polyester markets will present a bearish outlook in 2020, led by capacity additions in Asia, slowing global economies and trade tensions. The US, on the other hand, looks set to remain a net importer of PET due to the delayed start-up of a mega-plant.

### Global petrochemical trends

This book gives information on the OPEC nations' changing roles in the world oil market as they expand to "downstream" activities. It provides an overview of the production capabilities and policies of major oil exporters and examines the refinery overcapacity crisis in the developed world.

In *The Chemical Industry at the Millennium*, Peter Spitz and a team of industry experts look at this complex and fascinating industry. Concentrating on basic and specialty chemicals, chapter authors examine many of the trends and market factors that have affected the chemical industry in the recent past. The book offers an insider's view of the restructuring and reengineering crazes and the improvements and roadblocks offered by information technology and the Internet. Other factors that came into play include the impact of environmental regulations and globalization, and the financial community's demand for greater shareholder value. Each is discussed in turn. *The Chemical Industry at the Millennium* is a must read for industry professionals and anyone else interested in the changes and challenges facing a great and essential industry.

*Biocomposites: Design and Mechanical Performance* describes recent research on cost-effective ways to improve the mechanical toughness and durability of biocomposites, while also reducing their weight. Beginning with an introduction to commercially competitive natural fiber-based composites, chapters then move on to explore the mechanical properties of a wide range of biocomposite materials, including polylactic, polyethylene, polycarbonate, oil palm, natural fiber epoxy, polyhydroxyalkanoate, polyvinyl acetate, polyurethane, starch, flax, poly (propylene carbonate)-based biocomposites, and biocomposites from biodegradable polymer blends, natural fibers, and green plastics, giving the reader a deep understanding of the potential of these materials. Describes recent research to improve the mechanical properties and performance of a wide range of biocomposite materials Explores the mechanical properties of a wide range of biocomposite materials, including polylactic, polyethylene, polycarbonate, oil palm, natural fiber epoxy, polyhydroxyalkanoate, polyvinyl acetate, and polyurethane Evaluates the potential of biocomposites as substitutes for petroleum-based plastics in industries such as packaging, electronic, automotive, aerospace and construction Includes contributions from leading experts in this field

This book focuses on the global economy, oil industry, natural gas industry, hydrogen energy industry, wind power industry, and low-carbon market in the post-pandemic era of China and the whole world. It provides the overview of the China's energy economy development in 2021 and has an in-depth analysis of the future development trends of the oil and gas and new energy industries. It aims to present Chinese insights on the development of the energy industry of China and the world.

In this book, the authors set forth a new model of globalization that lays claims to supersede existing models, and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization, military globalization, trade, finance, corporate productivity, migration, culture, and the environment. Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs. In mapping the shape and political consequences of globalization, the authors concentrate on six states in advanced capitalist societies (SIACS): the United States, the United Kingdom, Sweden, France, Germany, and Japan. For comparative purposes, other states particularly those with developing economics are referred to and discussed where relevant. The book concludes by systematically describing and assessing contemporary globalization, and appraising the implications of globalization for the sovereignty and autonomy of SIACS. It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation.

The book provides a thorough analysis of strategy formulation at country and company level in Arab countries and corporations. It also deals with the issue of entrepreneurial initiative in Arab countries and issues actual practice of entrepreneurship. Role of the financial markets, especially venture capital and private equity are examined.
