The Merck Manual Go-To Home Guide for Symptoms takes complex medical information and makes it easy to understand and accessible to an everyday audience. It covers a wide range of everyday symptoms, from abdominal pain to wheezing, and almost everything in between. Every section provides a comprehensive look at each symptom's Causes: both common and less-common, Evaluation: warning signs, when to see a doctor, what the doctor does, and testing, Treatment: a wide-array of options, and Key points: the most important information about the symptom. It also includes helpful tables and illustrations. Organized in a (2- color, 500 page) paperback format makes it easy for busy families to quickly find the information they need. Symptoms covered include: Back Pain, Cough, Fatigue, Fever, Headache, Heartburn, Itching, Joint Pain, Nausea, Swelling and many more...

Safety in any workplace is extremely important. In the case of the electrical industry, safety is critical and the codes and regulations which determine safe practices are both diverse and complicated. Employers, electricians, electrical system designers, inspectors, engineers and architects must comply with safety standards listed in the National Electrical Code, OSHA and NFPA 70E. Unfortunately, the publications which list these safety requirements are written in very technically advanced terms and the average person has an extremely difficult time understanding exactly what they need to do to ensure safe installations and working environments. Electrical Safety Code Manual will tie together the various regulations and practices for electrical safety and translate these complicated standards into easy to understand terms. This will result in a publication that is a practical, if not essential, asset to not only designers and company owners but to the electricians who must put compliance requirements into action in the field. Best-practice methods for accident prevention and electrical hazard avoidance Current safety regulations, including new standards from OSHA, NEC, NESC, and NFPA Information on low-, medium-, and high-voltage safety systems Step-by-step guidelines on safety audits Training program how-to's, from setup to rescue and first aid procedures

A possible life-saving reference to keep around the house or in the car, DK's First Aid Manual looks at more than 100 different conditions, from splinters and sprained ankles to strokes and unconsciousness, and shows exactly what to do with step-by-step photographic sequences. Every condition is clearly explained, outlining causes, symptoms, and signs, and action plans. The updated design makes the instructions easier to follow, whether you need information on emergency first aid, first aid for babies and children, or tips on resuscitation. This ACEP First Aid Manual is an invaluable resource to keep you and your loved ones safe and healthy.

Emetophobia is one of the least known and most debilitating phobias. Ken Goodman has created an easy to follow, step-by-step program to help emetophobe and panic attacks sufferers transform their lives. Unfortunately, people don't make real change by learning new information. They change by living new experiences. The Emetophobia Manual lays out an experiential program that includes dozens of transformative exercises as well as QR codes enabling readers to watch videos on their smart phone. The tools and strategies in this program are based on Cognitive Behavioral Therapy, which has been validated by research as the most effective treatment for anxiety. With eye-opening metaphors, powerful tools, and lighthearted humor, Goodman gets readers onto their feet and motivates them to take steps towards freedom. Otherwise, it's like reading a cookbook in bed. In the end, you have nothing to show for it.
