greatest scientific minds history has to offer, from Archimedes to Stephen Hawking.

We all make mistakes. Nobody is perfect. And that includes five of the greatest scientists in history -- Charles Darwin, William Thomson (Lord Kelvin), Linus Pauling, Fred Hoyle, Albert Einstein. But the mistakes that these great scientists made helped science to advance. Indeed, as Mario Livio explains in this fascinating book, science thrives on error; it advances when erroneous ideas are disproven. All five scientists were great geniuses and fascinating human beings. Their blunders were part of their genius and part of the scientific process. Livio brilliantly analyses their errors to show where they were wrong and right, but what makes his

book so enjoyable to read is Livio's analysis of the psychology of these towering figures. Along the way the reader learns an enormous amount about the evolution of life on earth and in the universe, but from an unusual vantage point -- the mistakes of great scientists rather than the achievements that made them famous.

This Biography Series narrates the life stories of the great scientists and about their inventions. These books inspire & motivate children and enhance their knowledge and vocabulary skills as well.

Nearly forty of the world's most esteemed scientists discuss the big questions that drive their illustrious careers. Co-editor

Eduardo Punset—one of Spain's most loved personages for his popularization of the sciences—interviews an impressive collection of characters drawing out the seldom seen personalities of the world's most important men and woman of science. In *Mind, Life and Universe* they describe in their own words the most important and fascinating aspects of their research. Frank and often irreverent, these interviews will keep even the most casual reader of science books rapt for hours. Can brain science explain feelings of happiness and despair? Is it true that chimpanzees are just like us when it comes to sexual innuendo? Is there any hard evidence that life exists anywhere other than on the Earth? Through Punset's skillful questioning, readers will meet one scientist who is passionate about the genetic control of everything and

Eureka! races through twenty-three centuries of the spirit of enquiry and discovery, which uncovered secret after secret about the ways of nature. From early Greeks to twentieth-century scientists, this book takes readers to the discoveries of Copernicus, Kepler, Newton, Ampère, Huygens, Dalton, Darwin and many more. Each chapter describes the work of pivotal scientists who sought out and seized patterns that transformed human understanding of nature and the world. The work of each scientist is presented in the context of the time, the challenges faced, the misconceptions cleared and the opposition overcome. This book tells the story of how scientists, through the ages, strove to understand the nature of the physical world, and will, hopefully, inspire new ways of

Written in simple and lucid language, these biographical sketches of great scientists have been put together for ready reference. History of the world is replete with such instances of such men and women who went against all the odds and achieved great heights and changed the shape of the world. In fact, reading about the life-sketch of a scientist and his achievements, has certainly great infotainment value. Besides, the lives of great men and women provide us inspiration to do things differently, and more confidently. For some people these inspirations have more importance than any other motivational factors. When we learn that Edison was a poor boy without any formal schooling or Faraday was

an apprentice at a stationery shop we feel greatly motivated and think, 'if they could do it we can do it too!'. We find a new confidence in ourselves. In this respect the importance of these books, specially for children, can hardly be underestimated. Rather they could even be a part of the curriculum-- as at times they can prove so inspiring and motivate a person in such a way, that they could change the entire course of the life of a person. The main aim of this series is to expand the mental horizons of our readers and motivate them to achieve great heights in life. It is certainly a very valuable addition to the literature of popular science. The book can also prove to be an ideal companion during leisure time.
