this stunning debut collection flawlessly charts the emotional journeys of characters seeking love beyond the barriers of nations and generations. With accomplished precision and gentle eloquence, Jhumpa Lahiri traces the crosscurrents set in motion when immigrants, expatriates, and their children arrive, quite literally, at a cultural divide. A blackout forces a young Indian American couple to make confessions that unravel their tattered domestic peace. An Indian American girl recognizes her cultural identity during a Halloween celebration while the Pakistani civil war rages on television in the background. A latchkey kid with a single working mother finds affinity with a woman from Calcutta. In the title story, an interpreter guides an American family through the India of their ancestors and hears an astonishing confession. Imbued with the sensual details of Indian culture, these stories speak with passion and wisdom to everyone who has ever felt like a foreigner. Like the interpreter of the title story, Lahiri translates between the strict traditions of her ancestors and a baffling new world.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in

Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

demonic possession, or simply sheer obliviousness. This book profiles dozens of outsider musicians, both prominent and obscure—figures such as The Shaggs, Syd Barrett, Tiny Tim, Jandek, Captain Beefheart, Daniel Johnston, Harry Partch, and The Legendary Stardust Cowboy—and presents their strange life stories along with photographs, interviews, cartoons, and discographies. About the only things these self-taught artists have in common are an utter lack of conventional tunefulness and an overabundance of earnestness and passion. But, believe it or not, they're worth listening to, often outmatching all contenders for inventiveness and originality. A CD featuring songs by artists profiled in the book is also available.

This book explains design thinking methodology that is applied by high-performing enterprises, start-ups and organizations in developing innovative products; technologies; services; business models; marketing ideas; processes; spaces; and solutions for diverse business, social, and everyday challenges. It includes easily applicable design thinking techniques, such as HMW questions, personas, mind mapping, empathy mapping, affinity diagram, value-proposition canvas, storyboard, cause-and-effect diagram, brainstorming, brain dumps, reverse brainstorming, benchmarking, journey map, and prototyping. A real-life case study

is used to introduce design thinking methodology and techniques in a more practical way to a broad range of practitioners, including project managers and IT specialists, innovation teams, marketing professionals and brand managers, product managers, designers, consultants, strategic planning experts, C-level executives, and architects. The book explains how artful thinking perspectives can be applied to enhance design thinking skills, such as creativity, thinking out of the box, empathy, visual thinking, observation, asking the right questions, and pattern recognition. It also describes how to apply design thinking and lean and agile methodologies together."

Principles of Marketing, helps students understand how to create value, build customer relationships and master key marketing challenges. Confronting Managerialism offers a scathing critique of the influence of neoclassical economics and modern finance on business school teaching and management practice. Locke and Spender show that responsible management has given way to 'managerialism',

whereby an elite caste of businessmen disconnected from any ethical considerations call the shots. The book traces the loss of managers' earlier social concerns, amply encouraged by management education's transformation since the 1960's, especially in the US. It also questions not only the social ethics of the US management caste but its management efficacy compared to systems of management that are highly employee participatory and dependent, such as in Germany and Japan. A unique, topical and controversial look at a subject that impacts us all.

the stability, reliability and dynamic behaviour of structures and their components under extreme environmental conditions has dominated research in structural engineering for many decades. Advances in these areas have revolutionized design methods, codes of practice, and the teaching of structural engineers. In this volume an international body of leading authorities presents some forty papers on current research directions in the specific areas of solid mechanics, structural computation, modern materials and their application, buckling and instability, design of structural systems and components, reliability, seismic analysis, and engineering education. They were presented at a symposium held July 10-12, 1994, at the University of Waterloo, Canada, to honour Professor Archibald Norbert Sherbourne who recently retired from a long and active career of teaching, research and academic administration at this University. The themes of the work contained within this volume reflect Professor Sherbourne's own research interests and will be of interest to both academics and practicing structural engineers.
