guidelines for home rehabilitation of your dog after surgery for torn knee ligament the first four weeks basic is available in our digital library an online access to it is set as public so you can get it instantly. Our books collection spans in multiple countries, allowing you to

I have developed the guidelines in this book for use in my mobile animal rehabilitation practice so that I and/or pet caretakers may practice them in the home or any other environment conducive to the work (clinic, barn, quiet park, mountaintop...) in order to rehabilitate their pets after injury and/or surgery. No special tools or equipment are needed for the majority of the exercises and drills I utilize on a daily basis and present in this book..

These successful homework guidelines are based on my having over 30 years experience in sport science and exercise program design, as well as based on much related research. I have been in veterinary-based, companion animal rehabilitation for almost 10 years and have developed these guidelines for use in my mobile animal rehabilitation practice so that pet caretakers may practice them in the home environment to rehab their pets after injury and/or surgery. No special tools or equipment are needed for the majority of the exercises and drills I utilize on a daily basis and present in this book. You do need to be able to understand and follow instructions contained in this volume. I do my rehabilitation work in collaboration with veterinarians, and it is my strong suggestion that you do the same where a veterinarian is available. Thank you, on behalf of your pet, for taking this time to learn more about the healing methods available for them.

Volume numbers determined from Scope of the guidelines, p. 12-13.

"Home Rehabilitation Guide to Clinical Practice is a portable clinical reference guide designed exclusively for home health therapists. With much clinical information, this resource helps you provide the very best care to your diverse patient population."--Jacket.

This edition addresses the cost effectiveness of interventions that educate and motivate patients to assume personal responsibility for long-term disease prevention.
