The Handbook of Police Psychology features contributions from over 30 leading experts on the core matters of police psychology. The collection surveys everything from the beginnings of police psychology and early influences on the profession; to pre-employment screening, assessment, and evaluation; to clinical interventions. Alongside original chapters first published in 2011, this edition features new content on deadly force encounters, officer resilience training, and police leadership enhancement. Influential figures in the field of police psychology are discussed, including America's first full-time police psychologist, who served in the Los Angeles Police Department, and the first full-time police officer to earn a doctorate in psychology while still in uniform, who served with the New York Police Department. The Handbook of Police Psychology is an invaluable resource for police legal advisors, policy writers, and police psychologists, as well as for graduates studying police or forensic psychology.

American men live sicker lives and die at a younger age than American women. Why? Men are notorious for neglecting their health. They skip annual physicals. They eat too many unhealthy foods. They lack exercise, sufficient sleep, and may imbibe in substance abuse. Until they become sick enough and are dragged into the doctor's office, whatever medical issue is diagnosed, it could be too late to treat. But it doesn't have to be this way. Men make choices everyday which should include following healthy lifestyle habits. Dr. David Samadi, a world renowned urologist and prostate cancer surgeon, developer of SMART surgery, and a top medical contributor for Newsmax TV, has written The Ultimate MANual as a comprehensive and life-changing guide to everything on men's health. Over the course of his more than 20 years as a physician, he has helped thousands of men improve their health and quality of life.
