Histotechnology.

~~Histologic preparations : common problems and their ...~~

The next step in histological preparation is embedding, which involves supporting specimens in media that has similar mechanical rigidity to the specimen itself.

# Read PDF Histologic Preparations

Choosing the right embedding medium is critical, because if it is too stiff or too weak, defects may occur while sectioning. By far, the most common media used for embedding is paraffin wax.

~~Histological Sample Prep for a Light  
Microscope | Protocol~~

# Read PDF Histologic Preparations

Various agents can be used for infiltrating and supporting specimens including epoxy and methacrylate resins but paraffin wax-based histological waxes are the most popular for routine light microscopy. This produces so-called "paraffin sections". These sections are usually prepared with a "rotary" microtome.
