Holocaust Archaeologies: Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political, social, ethical and religious issues that surround investigations of this period and by considering how to address them. It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested.

Acces PDF History Paper 1 November 2013

It presents an interdisciplinary methodology in order to demonstrate how archaeology can (uniquely) contribute to the history of this period. Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed. This book challenges many of the widely held perceptions concerning the Holocaust, including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well-known. The typologically , temporally and spatial diverse body of physical evidence pertaining to this period

is presented and future possibilities for investigation of it are discussed. Finally, the volume concludes by discussing issues relating to the “re-presentation” of the Holocaust and the impact of this on commemoration, heritage management and education. This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence.

texts: how and why we make them and how we respond to them. Launched in 2005, Google Earth is a virtual globe, map and geographical information program, mapping the Earth by the superimposition of images obtained from satellite imagery and aerial photography. By addressing the sociopolitical issues at stake in society's use of social websites, the author provides the first ever extended close reading of Google Earth as a powerful player in the communication realm of social media. By grounding the context of its military pre-history, its construction, its links to other similar world-making sites such as Google Maps and how it is perceived critically by social

scientists, it is imperative to understand how social networking and information sites work in socio and geo-political contexts if society is to use these sites effectively and for the public good.

From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder

perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event

management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

Much of world's documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their

reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly inaccessible and neglected archives from across the globe. *From Dust to Digital* showcases the historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival

records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

Social Finance brings together rapid advances in what used to be called socially responsible investment. For example, finance for green businesses, and to support economic development both in deprived areas and developing countries. This book is the first serious and comprehensive treatment of the phenomenon. (Quelle: buch.ch)

South Africa was born in war, has been cursed by crises and ruptures, and today stands on a precipice once again. This book explores the country's tumultuous journey from the Second Anglo-Boer War to 2021. Drawing on diaries, letters, oral testimony and diplomatic reports, Thula Simpson follows the South African

people through the battles, elections, repression, resistance, strikes, insurrections, massacres, crashes and epidemics that have shaped the nation. Tracking South Africa's path from colony to Union and from apartheid to democracy, Simpson documents the influence of key figures including Jan Smuts, Nelson Mandela, Steve Biko, P.W. Botha, Thabo Mbeki and Cyril Ramaphosa. He offers detailed accounts of watershed events like the 1922 Rand Revolt, the Defiance Campaign, Sharpeville, the Soweto uprising and the Marikana massacre. He sheds light on the roles of Gandhi, Churchill, Castro and Thatcher, and explores the impact of the World Wars, the armed struggle

and the Border War. Simpson's history charts the post-apartheid transition and the phases of ANC rule, from Rainbow Nation to transformation; state capture to 'New Dawn'. Along the way, it reveals the divisions and solidarities of sport; the nation's economic travails; and painful pandemics, from the Spanish flu to AIDS and Covid-19.

Shortly after the overwhelming victory of Hamas in the 2006 parliamentary and municipal elections, civil war broke out in the Gaza Strip between members of the two factions, Hamas and Fatah. The EU, along with the US, UN and Russia, not only gave its

support to Fatah against Hamas, but also imposed a tough siege on the Hamas government in an attempt to force it to accept the Quartet's political conditions, described by Hamas leaders as unfair and impossible. Many observers are convinced that the EU's behaviour in this matter has been unreasonable and has conflicted with the EU's own democratic beliefs and values. This book sheds light on the EU's policies in Palestine mainly from 2003- 2013, and provides a thorough examination of the inconsistencies and paradoxes in the EU discourse towards Hamas, and the determinants underlying such contradictions. It explores the reasons behind the EU labelling the Hamas a terrorist

organization and discusses why the EU has boycotted its democratically elected body since 2006. Significantly, the book looks at whether the EU jeopardized its reputation and contravened its core normative values and objectives (democracy promotion, human rights, the rule of law and fundamental freedoms) by such a categorisation of Hamas. Exploring the EU's policy towards Hamas is vital for understanding how the relationship between the EU and the rest of the Islamists in the Middle East is perceived, as it enables both sides to have a cognitive basis upon which to construct better relations. This book, based upon a vast spread of primary EU documents and

interviews, will therefore be a valuable resource for those studying the Arab Israeli conflict, Political Islamic movements, the Middle East Peace Process, and anyone with an interest in European Union Foreign Policy.

How do leading Labour figures strive to communicate with and influence the electorate? Why have some proven more successful than others in advancing their ideological arguments? How do orators seek to connect with different audiences in different settings such as parliament, party conference and through the media? This thoroughly researched and highly readable collection comprehensively

evaluates these questions as well as providing an extensive interrogation of the political and intellectual significance of oratory and rhetoric in the post-war Labour Party. This collection evaluates the oratory and rhetoric of twelve leading figures from Labour politics: Aneurin Bevan, Hugh Gaitskell, Harold Wilson, Barbara Castle, James Callaghan, Michael Foot, Tony Benn, Neil Kinnock, John Smith, Tony Blair, Gordon Brown and Ed Miliband. Each chapter explores how its subject attempted to use oratory to advance their agenda within the party and beyond. Students of British politics, Labour history and communication studies will find this volume essential reading.
