Economic collapse, poverty, disease, natural disasters, the constant threat of community unrest and international terrorism--a quick look at any newspaper is enough to cause almost anyone to feel trapped and desperate. Yet the recent election also revealed a growing search for hope spreading through society. In the timely Hope in the Age of Anxiety, Anthony Scioli and Henry Biller illuminate the nature of hope and offer a multitude of techniques designed to improve the lives of individuals, and bring more light into the world. In this fascinating and humane book, Scioli and Biller reveal the ways in which human beings acquire and make use of hope. Hope in the Age of Anxiety is meant to be a definitive guide. The evolutionary, biological, and cultural roots of hope are covered along with the seven kinds of hope found in the world's religions. Just as vital, the book provides many personal tools for addressing the major challenges of the human condition: fear, loss, illness, and death. Some of the key areas illuminated in Hope in the Age of Anxiety: How do you build and sustain hope in trying times? How can hope help you to achieve your life goals? How can hope improve your relationships with others? How can hope aid your recovery from trauma or illness? How does hope relate to spirituality? Hope in the Age of Anxiety identifies the skills needed to cultivate hope, and offers suggestions for using these capacities to realize your life goals, support health and healing, strengthen relationships, enhance spirituality, and inoculate yourself against the despair that engulfs many individuals.

It is difficult to be hopeful in the midst of daily news about the effects of climate change on people and our planet. While the Christian basis for hope is the resurrection of Jesus, unfortunately far too many American Protestant Christians do not connect this belief with the daily witness of their faith. This book argues that the resurrection proclaims a notion of hope that should be the foundation of a theology of creation care that manifests itself explicitly in the daily lives of believers. Christian hope not only inspires us to do great and courageous things but also serves as a critique of current systems and powers that degrade humans, nonhumans, and the rest of creation and thus cause us to be hopeless. Belief in the resurrection hope should cause us to be a different sort of people. Christians should think, purchase, eat, and act in novel and courageous ways because they are motivated daily by the resurrection of Jesus. This is the only way to be hopeful in the age of climate change.

Between alcohol, illegal drugs, prescription drugs, pornography, gambling, and eating disorders, fully 25% of the population of the United States is addicted to something. Those addictions are taking a massive physical, emotional, spiritual, and financial toll on individuals, families, and communities. The problem can feel insurmountable. But there is a solution, at once ancient and supported by the latest in neuroscientific research. With an honest assessment of the facts, yet always reaching out toward hopeful solutions, counselors Chip Dodd and Stephen James explain what addiction really is, how it works, and why it is so damaging to our hearts, souls, minds, and relationships. They then take us beyond mere coping techniques that allow us to function to the real solution--restoring our broken relationship with our Creator so that we can rediscover how to live fully the way we were created to live. Each chapter includes the personal story of a recovering addict, told from the addict's point of view. The authors also include a list of books, organizations, workshops, and treatment centers people can turn to for help along the road to lasting recovery.

Born in 1930 in a small town outside Winnipeg, beautiful Hope Koop appears destined to have a conventional life. Church, marriage to a steady young man, children--her fortunes are already laid out for her, as are the shiny modern appliances in her new home. All she has to do is stay with Roy, who loves her. But as the decades unfold, what seems to be a safe, predictable existence overwhelms Hope. Where--among the demands of her children, the expectations of her husband and the challenges of her best friend, Emily, who has just read The Feminine Mystique--is there room for her? And just who is she anyway? A wife, a mother, a woman whose life is somehow unrealized? This beautifully crafted and perceptive work of fiction spans some fifty years of Hope Koop's life in the second half of the 20th century, from traditionalism to feminism and beyond. David Bergen has created an indelible portrait of a seemingly ordinary woman who struggles to accept herself as she is, and in so doing becomes unique.

I can't face this. No one understands how hard it is for me. People are looking at me. Why am I like this? Why can I not be like everyone else? What's wrong with me? Sound familiar? Thoughts such as these can trigger us to feel anxious, stupid, upset and frustrated. We have choices. We can blame ourselves and others, avoid certain situations and worry. Or we can acknowledge our thoughts and feelings and take our power back from anxiety by facing it with understanding, courage and compassion. Here, taking a self-compassionate approach, Dr Claire Hayes presents anxiety as a normal part of every stage of life, from childhood through to adolescence and adulthood. Using the principles of Cognitive Behavioural Therapy (CBT), Dr Hayes helps us to recognise, understand and take control of the unhelpful thoughts, beliefs and actions that cause anxiety. This book offers hope to people who struggle with anxiety, as well as to those who support them. 'Helps us understand how we contribute unwittingly to our own difficulties, how we can change the way we think, feel and act, and thus live a more fulfilling life.' Dr Rosaleen McElvaney, Clinical Psychologist, Psychotherapist and Lecturer, School of Nursing and Human Sciences, DCU 'Offers gentle ways to hope and cope in the Age of Anxiety.' Professor Philip C. Kendall, Temple University, Philadelphia 'Truly outstanding ... I can think of no other work in this area that I would recommend as strongly.' Mark Morgan, Cregan Professor of Education and Psychology, DCU

A philosophical memoir about becoming a father in an increasingly terrible world – can I hope the child growing in my partner's womb will have a good-enough life? For Kant, philosophy boiled down to three key questions: “What can I know?”, “What ought I do?”, and “What can I hope for?” In philosophy departments, that third question has largely been neglected at the expense of the first two – even though it is crucial for understanding why anyone might ask them in the first place. In *Ininitely Full of Hope*, as he prepares to become a father for the first time, the philosopher Tom Whyman attempts to answer Kant’s third question, trying to make sense of it in the context of a world that increasingly seems like it is on the verge of collapse. Part memoir, part theory, and part reflection on fatherhood, *Ininitely Full of Hope* asks how we can cling to hope in a world marked by crisis and disaster.

Uses premodern theology and postmodern theory to show the endurance of religious and political commitments through the practice of hope.

How are Christians to live in such difficult times? Unique of all people, Christians are called to embrace a hopeful outlook on life. Mere Hope offers the core, Christ-centered perspective that all Christians share, and that Christians alone have to offer a world filled with frustration, pain, and disappointment. For those in darkness, despair, and discouragement, for those in the midst of trials, suffering, and injustice, mere hope lives. The spirit of the age is cynicism. When our leaders, our families, and our friends let us down at every turn, this isn't surprising. But we need another perspective; we need hope. Rather than reflecting resigned despair or distracted indifference, author Jason Duesing argues, our lives ought to be shaped by the gospel of Jesus—a gospel of hope.

The timeless human desire to be more beautiful, intelligent, healthy, athletic, or young has given rise in our time to technologies of human enhancement. Athletes use drugs to increase their strength or stamina; cosmetic surgery is widely used to improve physical appearance; millions of men take drugs like Viagra to enhance sexual performance. And today researchers are exploring technologies such as cell regeneration and implantable devices that interact directly with the brain. Some condemn these developments as a new kind of cheating—not just in sports but in life itself—promising rewards without effort and depriving us most of all of what it means to be authentic human beings. “Transhumanists,” on the other hand, reject what they see as a rationalizing of human limits, as if being human means being content forever with underachieving bodies and brains. To be human, they insist, is to be restless with possibilities, always eager to transcend biological limits. As the debate grows in urgency, how should theology respond? Christian theologians recognize truth on both sides of the argument, pointing out how the yearnings of the transhumanists—if not their technological methods—find deep affinities in Christian belief. In this volume, Ronald Cole-Turner has joined seasoned scholars and younger, emerging voices together to bring fresh insight into the technologies that are already reshaping the future of Christian life and hope.

At the moment of his greatest professional success, veteran newspaperman & author of this book was struck by a crippling depression. Neither psychotherapy nor Prozac helped him, & it wasn't until he began a painful probe of his life & an investigation into depression's larger issues that he saw a way out. Not a depression memoir, *Finding Hope in the Age of Melancholy* uses the author's personal experience to launch a profound & inspiring exploration of the depression epidemic in our society. Weaving literature, philosophy, economics, religion, & medicine into a discussion about the roots of our barren culture, the author comes to provocative conclusions. He shows how the nature of our society is often as much to blame for depression as brain chemistry is, how depression can be a positive goad to creativity & deeper self-understanding, & why religious belief & community involvement are often more potent therapies than drugs & the analyst's couch. This is a deeply helpful & illuminating book for all who are looking for meaning in their lives
