This volume focuses on about thirty residential villas and palaces, giving the reader the opportunity to visit the magnificent palaces of Venice, Genoa, and Mantua, the elegant villas designed by Palladio and decorated by Tiepolo; the country villas of Tuscany, hidden in olive groves and vineyards; and the austere palaces of Florence-not to mention the Versaces' villa on Lake Como. The interiors of these palaces are magnificent to behold: splendid tapestries, exquisite paintings and murals, sumptuous furniture and interior decoration of all kinds, from elegant carved molding to magnificently inlaid and tiled floors to beautiful renaissance, baroque, and neoclassical furniture. Archaeology has unearthed the glories of ancient Jewish buildings throughout the Mediterranean. But what has remained shrouded is what these buildings meant. Building Jewish first surveys the architecture of small rural villages in the Galilee in the early Roman period before examining the development of synagogues as "Jewish associations." Finally, Building Jewish explores Jerusalem's flurry of building activity under Herod the Great in the first century BCE. Richardson's careful work not only documents the culture that forms the background to any study of Second Temple Judaism and early Christianity, but he also succeeds in demonstrating how architecture itself, like a text, conveys meaning and thus directly illuminates daily life and religious thought and practice in the ancient world.

color photographs, Egyptian Palaces and Villas will entrance and delight anyone interested in this proud land and its dramatic history.

Roman Villas explores the social structures of the Roman world by analysing the plans of buildings of all sizes from slightly Romanized farms to palaces. The ways in which the rooms are grouped together; how they intercommunicate; and the ways in which individual rooms and the house are approached, reveal various social patterns, which question traditional ideas about the Roman family and household. J. T. Smith argues that virtually all houses were occupied by groups of varying composition, challenging the received wisdom that they were single family houses whose size reflected only the owner's wealth and number of servants. Roman Villas provides a meticulously documented and scholarly examination of the relationship between the living quarters of the Roman and their social and economic development which introduces a new area in Roman studies and a corpus of material for further analysis. The inclusion of almost 500 ground plans, drawn to a uniform scale, allows the reader to compare the similarities and differences between house structure as well as effectively illustrating the arguments.
