This book/CD package takes an active learning approach to human geography. Computerized activities expose readers to GIS, spreadsheets, simulation and graphing—without having to learn four different complex software packages. The exercises explore AIDS, population growth, jobs, environmental change, baseball and other interesting topics. This book teaches readers how to collect, analyze, interpret and present information.

Michael Kuby's 6th edition of Human Geography in Action is comprised of 14 stimulating, concept-based chapters. The text aims to develop geographic problem-solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept, followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its "Do Geography" approach. Human Geography in Action provides the opportunity to: use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth and assess future growth areas.

Human Geography gets general readers to think geographically across scale and across a wide range of geographical phenomena and global issues. All concepts and themes are touched on with the historical background one would expect, but also with current examples to make the reading more relevant. The content is written in such a way that it is approachable and appealing. It includes all of the important themes in a succinct and engaging narrative style that can easily be understood. From the Field boxes and opening vignettes help anyone who has not personally traveled much of the world. General readers will also find the latest data as they build their understanding of important concepts.

"Geography for students of the International Baccalaureate Diploma, New South Wales Higher School Certificate, and other senior secondary geography courses with a contemporary global focus" -- back cover.

This book provides a comprehensive discussion on urban growth and sprawl, and how they can be analyzed using remote sensing imageries. It compiles views of numerous researchers that help in understanding the urban growth and sprawl; their patterns, process, causes, consequences, and countermeasures; how remote sensing data and geographic information system techniques can be used in mapping, monitoring, measuring, analyzing, and simulating the urban growth and sprawl and what are the merits and demerits of available methods and models. This book will be of value for the scientists and researchers engaged in urban geographic research, especially using remote sensing imageries. This book will serve as a rigours literature review for them. Post graduate students of urban geography or urban/regional planning may refer this book as additional studies. This book may help the academicians for preparing lecture notes and delivering lectures. Industry professionals may also be benefited from the discussed methods and models along with numerous citations.

WorldMinds provides broad exposure to a geography that is engaged with discovery, interpretation, and problem solving. Its 100 succinct chapters demonstrate the theories, methods, and data used by geographers, and exemplify the conceptual and topical richness of contemporary geography. The 150 contributing authors and co-authors address the challenges posed by issues such as globalization, regional and ethnic conflict, environmental hazards, terrorism, poverty, and sustainable development. This volume demonstrates the utility of geography as a conceptual discipline that contributes theoretically; as an applied practice that informs policy-making; and as a coherent set of methodologies to gather and analyze data about Earth and its occupants. WorldMinds is the ideal general reader to supplement textbooks in the full range of academic geography courses. In addition to geography students and instructors, it is relevant to researchers, applied geographers and policy makers.
