Human Perspectives 3A/3B has been written to address the updated units of the Human Biology course. Each chapter features information under clear subject headings making it easy to navigate, read and assimilate. The content is highly illustrated with photographs, electron micrograph images and annotated diagrams, which are designed to engage students and to encourage scientific thinking, investigation and problem solving. The text is supported by a NelsonNet website and NelsonNetBook.

Take a unique look at today's Earth as you examine its natural processes, complex systems and the reciprocal relationship between people and Earth's natural environment. Written by three of today's most respected geographers, Petersen/Sack/Gabler's PHYSICAL GEOGRAPHY, 12E introduces geography from three perspectives: as a physical science, a spatial science and an environmental science. An intriguing, reader-friendly presentation demonstrates the processes and interactions among Earth's systems and emphasizes environmental sustainability, highlighting how natural systems are affected by human activities and how natural processes impact human lives. Updated, compelling visuals illustrate concepts through vivid photos, helpful figures, information-rich maps and thought-provoking captions. This edition also explores dynamic areas of the Earth, such as the Pacific Ring of Fire, and examines the latest digital, drone and laser technologies in use in geographical research. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"The Outline Bible is a tool for making the content of the Bible easy and enjoyable to learn--and remember! This handy resource organizes every single verse of the Bible into an easy-to-remember outline format. Each of the major levels of the outlines uses a literary device--such as alliteration, rhyme, etc.--to help the point stick in your mind and heart, and the unique formatting for each level helps you easily recognizes it on the page." -- Introduction

This volume is intended to stimulate a change in the practice of decision support, advocating an interdisciplinary approach centred on both social and natural sciences, both theory and practice. It addresses the issue of analysis and management of uncertainty and risk in decision support corresponding to the aims of Integrated Assessment. A pluralistic method is necessary to account for legitimate plural interpretations of uncertainty and multiple risk perceptions. A wide range of methods and tools is presented to contribute to adequate and effective pluralistic uncertainty management and risk analysis in decision support endeavours. Special attention is given to the development of one such approach, the Pluralistic fRamework for Integrated uncertainty Management and risk Analysis (PRIMA), of which the practical value is explored in the context of the Environmental Outlooks produced by the Dutch Institute for Public Health and Environment (RIVM). Audience: This book will be of interest to researchers and practitioners whose work involves decision support, uncertainty management, risk analysis, environmental planning, and Integrated Assessment.

4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Expanding on its widely respected and unique focus on the critical role of professionals in education, psychology, counseling, health care, and human services, HUMAN EXCEPTIONALITY: SCHOOL, COMMUNITY, AND FAMILY, 12th Edition, is an evidence-based testament to the critical role of cross-professional collaboration in enhancing the lives of exceptional individuals and their families. This text's unique lifespan approach combines powerful research, evidence-based practices, and inspiring stories, engendering passion and empathy and enhancing the lives of individuals with exceptionalities. Designed to help students experience individuals with disabilities and their families in a personal and intimate fashion, HUMAN EXCEPTIONALITY is an excellent resource for preparing teacher education candidates and practicing teachers, as well as a range of other human services professionals in the fields of psychology, sociology, social work, and the health sciences. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

As stated in one of the chapters of the Books dealing with my Confessions, after hearing the Popes Call on the Laity to rise up and contribute to the success of the New Evangelization, I wondered if I could respond to his Call as a Member of The Knights of Columbus and the EWTN family, with extensive Professional exposure across the secular governance of the world. I reflected and prayed on this Call for two weeks. Then I decided to respond to the Popes Call.

This fascinating volume, assessing Lower and Middle Pleistocene African prehistory, argues that the onset of the Middle Stone Age marks the origins of landscape use patterns resembling those of modern human foragers. Inaugurating a paradigm shift in our understanding of modern human behavior, Grant McCall argues that this transition—related to the origins of “home base” residential site use—occurred in mosaic fashion over the course of hundreds of thousands of years. He concludes by proposing a model of brain evolution driven by increasing subsistence diversity and intensity against the backdrop of larger populations and Pleistocene environmental unpredictability. McCall argues that human brain size did not arise to support the complex patterns of social behavior that pervade our lives today, but instead large human brains were co-opted for these purposes relatively late in prehistory, accounting for the striking archaeological record of the Upper Pleistocene.

This lively, comprehensive introduction to human behavior in the social environment offers an integrative approach to biopsychosocial case formulations of current and developmental human behavior concerns. The sixth edition builds on prior efforts in promoting integrative assessments by adopting a specific method for completing case formulations that students apply to case studies in the book's developmental chapters. This innovation provides students with a bridge to the core competencies and recommended practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping them connect foundation knowledge with practice concerns. Guidelines for practice and relevant assessment tools are identified for specific life tasks and for each phase of biopsychosocial development. This edition also offers concrete methods for the translation of developmental research to assessment practices.
