Kids ask the darndest things . . . and here are the answers—all in one helpful book! Anyone who has ever been a kid, raised a kid, or spent any time with kids knows that asking questions is a critical part of growing up. Kids have curious minds and they come up with some very interesting questions. But the truth is adults don't always know the answers. The Handy Answer Book for Kids (and Parents) comes to the rescue. Written with a child's imagination in mind, this easy-to-understand book is a launching pad for curious young minds and a life raft for parents at wits end. It addresses nearly 800 queries with enough depth and detail to both satisfy the curiosity of persistent young inquisitors and provide parents with a secure sense of a job well done. It'll equip every parent for those difficult, absurd, or sometimes funny questions from their kids, such as Is there life on Mars? Do rivers ever dry up? Why are there wars? Is there such a thing as a funny bone? Why do dogs bark? Why is the sky blue? Why do people have to grow old? Why do people speak different languages?

The study of evolutionary adaptation returns to the center stage of biology with this important volume. This innovative treatise discusses new developments in adaptation, with new methods, and new theoretical foundations, achievements, and prospects for a rich intellectual future. It is an insightful reintroduction to the themes that Darwin and his successors regarded as central to any profound understanding of biology.

At last - a book that goes beyond bird identification and delves into the fascinating and little-known world of bird behaviour and biology. Birds - The Inside Story offers an absorbing insight into the lives of southern African birds, exploring a range of interesting topics that include: • The mechanisms of flight - did you know that albatrosses can fly thousands of kilometres without flapping their wings? • Intricate courtship rituals - did you know that some males offer females 'nuptial gifts' of food to strengthen the pair bond? • Nests and nest building - did you know that Sociable Weavers build nest 'mansions' that can accommodate up to 500 birds at one time? • Ingenious strategies for survival - did you know that African Jacana chicks hide from predators by submerging themselves in water, leaving only their bills sticking out? • The mysteries of migration - find out how birds navigate using the sun, the stars and the magnetic field of the Earth. Birds - The Inside Story will tell you more about these and many other fascinating aspects of the avian world. Richly illustrated with colour photographs and finely detailed illustrations that bring the subject to life, this book is bound to captivate bird enthusiasts of all ages.
