Inside The O'briens

Inside the O'Brien is an outstanding novel, possibly my favorite of all 20 books I have read so far this year. It is written by Dr. Lisa Genova, author of Still Alice. Joe O'Brien is a 44 year-old Irish Catholic police officer living in Charlestown, MA, the oldest neighborhood in Boston.

Inside the O'Brien by Lisa Genova - Goodreads

In lots of ways Inside the O'Brien is like Still Alice, except that the illness is more physical than neurological (or should I say the symptoms are as Huntington's is a neurological disease). Like Alice, Joe was losing a major part of himself, as a police officer his job was very physical where Alice's required her memory and intellect.

The O'Briens, the entire family, are individually introduced to Huntington's Disease. First, one of Boston's Finest, develops its strange symptoms and discovers cholera and other behaviors are to worsen until his early death. That news is not the worst.

Joe O'Brien is a forty-four-year-old police officer from the Irish Catholic neighborhood of Charlestown, Massachusetts. A devoted husband, proud father of four children in their twenties, and respected officer, Joe begins experiencing bouts of disorganized thinking, uncharacteristic temper outbursts, and strange, involuntary movements. He initially attributes these episodes to the stress of his job, but as these symptoms worsen, he agrees to see a neurologist and is handed a diagnosis that will change his and his family's lives forever: Huntington's Disease. Huntington's is a lethal neurodegenerative disease with no treatment and no cure. Each of Joe's four children has a 50 percent chance of inheriting their father's disease, and a simple blood test can reveal their genetic fate. While

watching her potential future in her father's escalating symptoms, twenty-one-year-old daughter Katie struggles with the questions this test imposes on her young adult life. Does she want to know? What if she's gene positive? Can she live with the constant anxiety of not knowing? As Joe's symptoms worsen and he's eventually stripped of his badge and more, Joe struggles to maintain hope and a sense of purpose, while Katie and her siblings must find the courage to either live a life "at risk" or learn their fate.

O'Brien is a Boston cop; his physical stamina and methodical mind have seen him through decades policing the city streets, while raising a family with his wife Rosie. When he starts making uncharacteristic errors, he attributes them to stress. Finally, he agrees to see a doctor and is handed a terrifying, unexpected diagnosis: Huntington's disease. Not only is Joe's life set to change beyond recognition, but each of his four grown children has a fifty-fifty chance of inheriting the disease. Observing her potential future play out in his escalating symptoms, his pretty yoga teacher daughter Katie wrestles with how to make the most of the here and now, and how to care for her dad who is, inside, always an O'Brien. grown children. When she begins to grow forgetful and disoriented, she dismisses it for as long as she can until a tragic diagnosis changes her life - and her relationship with her family and the world around her - for ever. Unable to care for herself, Alice struggles to find meaning and purpose as her concept of self gradually slips away. But Alice is a remarkable woman, and her family learn more about her and each other in their quest to hold on to the Alice they know. Her memory hanging by a frayed thread, she is living in the moment, living for each day. But she is still Alice. 'Remarkable ... illuminating ... highly relevant today' Daily Mail 'The most accurate account of what it feels like to be inside the mind of an Alzheimer's patient I've ever read. Beautifully written and very illuminating' Rosie Boycot 'Utterly brilliant' Chrissy Iley

Sarah Nickerson, a career-driven young mother, suffers a traumatic brain injury in a car accident that leaves her unable to perceive left-side information, a disability that causes her to struggle through an uncertain recovery as she adapts to her new life.

The O'Briens follows the family from The Law of Dreams two generations later: Joe O'Brien is coming of age in a new century in remote Pontiac County, Quebec, with his brothers and sisters by his side. Their

father has abandoned the family and died in the South African war; their frail mother has remarried the abusive and lecherous Mick Heaney. Joe and his siblings escape the poverty and violence of the Pontiac, but as Joe travels the continent, building an empire and a bright young family with his wife, Iseult, he is never quite able to leave his past behind. Told from the perspectives of Joe, Iseult, and their children and spanning the construction of the Canadian railroad as well as both world wars, this novel mirrors the scope and sweep of what Wilfrid Laurier calls "Canada's Century." Tragic, romantic, and as vivid as the novel that preceded it, *The O'Briens* is an epic of great heart, imagination, and narrative force.

“Unsparing in her depiction of the disease’s harrowing effects, neuroscientist Genova also celebrates humanity.” –People “Sometimes it’s easier to tell truth in fiction...And she tells it with heart and hope.” –NPR “Her juxtaposition of scientific detail with compassionate, heartfelt storytelling is unparalleled.” –Bookreporter “Every Note Played will grip and gut you.” –The Boston Globe From neuroscientist and New York Times bestselling author of *Still Alice* comes a powerful exploration of regret, forgiveness, freedom, and what it means to be alive. An accomplished concert pianist, Richard received standing ovations from audiences all over the world in awe of

his rare combination of emotional resonance and flawless technique. Every finger of his hands was a finely calibrated instrument, dancing across the keys and striking each note with exacting precision. That was eight months ago. Richard now has ALS, and his entire right arm is paralyzed. His fingers are impotent, still, devoid of possibility. The loss of his hand feels like a death, a loss of true love, a divorce—his divorce. He knows his left arm will go next. Three years ago, Karina removed their framed wedding picture from the living room wall and hung a mirror there instead. But she still hasn't moved on. Karina is paralyzed by excuses and fear, stuck in an unfulfilling life as a piano teacher, afraid to pursue the path she abandoned as a young woman, blaming Richard and their failed marriage for all of it. When Richard becomes increasingly paralyzed and is no longer able to live on his own, Karina becomes his reluctant caretaker. As Richard's muscles, voice, and breath fade, both he and Karina try to reconcile their past before it's too late. Poignant and powerful, *Every Note Played* is a masterful exploration of redemption and what it means to find peace inside of forgiveness.

From the bestselling author of *Still Alice* comes a heartfelt novel about friendship and a mother coping with the loss of her autistic son. Olivia Donatelli's dream of a 'normal' life was shattered when her

son, Anthony, was diagnosed with autism at age three. He didn't speak. He hated to be touched. He almost never made eye contact. And just as Olivia was starting to realise that happiness and autism could coexist, Anthony died. Now she's alone in a cottage on Nantucket, separated from her husband, desperate to understand the meaning of her son's short life, when a chance encounter with another woman facing her own loss brings Anthony alive again for Olivia in a most unexpected way. In a piercing story about motherhood, love and female friendship, Lisa Genova offers us two unforgettable women on the verge of change who discover the small but exuberant voice that helps them both find the answers they need. Fans of *The Reason I Jump* and *The Curious Incident of the Dog in the Night-time* will love Lisa Genova's story: always authentic and utterly moving. *'Remember how you couldn't put down *Still Alice*? Well, clear your schedule—because you're going to feel the same way' Jodi Picoult*

The Harvard-trained neuroscientist presents an exploration of the intricacies of human memory that distinguishes between normal and concerning memory loss while explaining the profound roles of sleep, stress, and other contributing influences.
