investment and wealth management in connection with Islamic finance. There is a noted scarcity of literature on Islamic approaches towards wealth management from a jurisprudential perspective, and so this book aims to address this lacuna in available literature. It demonstrates strategies for wealth management in keeping with the Qur'an and Sunnah, posing questions relating to interest and investment, and proposing financial models for benefiting the poorer segments of society while simultaneously satisfying economic necessities in keeping with Islamic law. Given its breadth of scope, combining perspectives from scholars and practitioners with extensive experience in the banking and finance sector from different Islamic settings including Malaysia, Saudi Arabia, Sri Lanka, Brunei and Indonesia, this edited volume will benefit practitioners, researchers, and graduate students studying finance, economics and business management in an Islamic context.

Through a thorough analysis of emerging legal and regulatory issues in Islamic finance law and practice in Malaysia, this exciting new study covers issues such as blockchain technology, anti-money laundering, and FinTech in Islamic finance.

A comprehensive look at the essentials of Islamic capital markets Bringing together theoretical and practical aspects of capital markets, Islamic Capital Markets offers readers a comprehensive insight into the institutions, instruments, and regulatory framework that comprise Islamic capital markets. Also exploring ideas about money, central banking, and economic growth theory and their role in Islamic capital markets, the book provides students and practitioners with essential information about the analytical tools of Islamic capital markets, serves as a guide to investing in Islamic assets, and examines risk management and the structure of Islamic financial products. Author and Islamic finance expert Nouredine Krichene examines the development of leading Islamic capital markets, including Malaysia, looking at sukuks and stocks in detail and emphasizing valuation, duration, convexity, immunization, yield curves, forward rates, swaps, and risks. Analyzing stock markets, stock valuation, price-earnings ratio, market efficiency hypothesis, and equity premiums, the book addresses uncertainty in capital markets, portfolio diversification theory, risk-return trade-off, pricing of assets, cost of capital, derivatives and their role in hedging and speculation, the principle of arbitrage and replication, Islamic structured products, the financing of large projects, and more. Emphasizes both theoretical and practical aspects of capital markets, covering analytical concepts such as the theory of arbitrage, pricing of assets, capital market pricing model, Arrow-Debreu state prices, risk-neutral pricing, derivatives markets, hedging and risk management, and structured products Provides students and practitioners of finance with must-have information about the analytical tools employed in Islamic capital markets Examines all the most recent developments in major Islamic capital markets, including Malaysia Discussing the advantages of Islamic capital markets and the prospects for their development, Islamic Capital Markets gives readers a fundamental grounding in the subject, with an emphasis on financial theory and real world practice.
