J.M.W. Turner, the Modern

From Erich Lessing Culture and Fine Arts Archive, J. M. W. Turner, The Decline of the Carthaginian Empire (exhibited 1817), Oil on canvas, 170 × 238 cm

ROMANTICISM. J.M.W. Turner is probably the greatest painter Britain has ever produced. Both profoundly original and astonishingly prolific, he helped transform landscape painting into an expressive art form of enormous range and power. This book reveals the extent to which Turner wanted his paintings to communicate intellectually as well as emotionally; and how intensely involved he was with the culture of his times, using landscape as a vehicle for the deepest ruminations on society, politics and the human condition. Sam Smiles discusses and illustrates the whole range of Turner's work, tracking his career from the 1790s to the 1840s, exploring the themes that motivated him, and explaining his importance to subsequent generations.

The second short biography in Peter Ackroyd's Brief Lives series concentrates on the life and work of perhaps the greatest and most original of all English Painters. James Mallord William Turner was a Londoner through and through. His father had a barber's shop in Covent Garden, his mother came from a line of London butchers. He was brought up in Maiden Lane. He was short and pugnacious and, as Peter Ackroyd writes: "His speech was recognizably that of a Cockney, and his language was the language of the streets." His language was also the language of light, as exemplified in his most innovative paintings, which caused the critics of the day to come to blows. His dying words were: "The Sun is God." Turner entered the Royal Academy at 14, and a year later was exhibiting. His first loves were architecture, engraving and watercolours, and the country houses, cathedrals and landscape of England. He came to oils through his new passion for Italy. This is the biography that Peter Ackroyd was born to write: Turner's Englishness, his temperament and his London background lie at the core of Ackroyd's lively personal interest in and specialist knowledge of London's history.

J.M.W. Turner was a fascinating and enigmatic figure. Both astonishingly prolific and extraordinarily innovative, he is widely seen as the greatest British landscape painter of them all, anticipating and surpassing the Impressionists in his dramatic interpretations of the effects of light and colour. The Turner Book goes beyond the usual interpretations of the artist, revealing the extraordinary self-belief and ambition that allowed him to continue steadfastly with his experimentation in the face of hostile critical attack. The book examines in detail key works and the techniques by which Turner realised them and features revealing extracts from his notebooks, travel journals and poetry. Beautifully illustrated with both famous and unknown works and ranging over the entire course of the artist's career, this is the essential guide to Turner's life and work. Sam Smiles is Professor of Art History at the University of Plymouth at Exeter and the author of numerous acclaimed books, including J.M.W. Turner, Two-way Traffic: British Art and Italian Art 1880-1980 and The Image of Antiquity: Ancient Britain and the Romantic Imagination.

The life of one of Western art's most admired and misunderstood painters J.M.W. Turner is one of the most important figures in Western art, and his visionary work paved the way for a revolution in landscape painting. Over the course of his lifetime, Turner strove to liberate painting from an antiquated system of patronage. Bringing a new level of expression and color to his canvases, he paved the way for the modern artist. Turner was very much a man of his changing era. In his lifetime, he saw Britain ravaged by Napoleonic wars, revived by the Industrial Revolution, and embarked upon a new moment of Imperial glory with the ascendancy of Queen Victoria. His own life embodied astonishing transformation. Born the son of a barber in Covent Garden, he was buried amid pomp and ceremony in St. Paul's Cathedral. Turner was accepted into the prestigious Royal Academy at the height of the French Revolution when a climate of fear dominated Britain. Unable to travel abroad he explored at home, reimagining the landscape to create some of the most iconic scenes of his country. But his work always had a profound human element. When a moment of peace allowed travel into Europe, Turner was one of the first artists to capture the beauty of the Alps, to revive Venice as a subject, and to follow in Byron's footsteps through the Rhine country. While he was commercially successful for most of his career, Turner's personal life remained fraught. His mother suffered from mental illness and was committed to Bedlam. Turner never married but had several long-term mistresses and illegitimate daughters. His erotic drawings were numerous but were covered up by prurient Victorians after his death. Turner's late, impressionistic work was held up by his Victorian detractors as example of a creeping madness. Affection for the artist's work soured. John Ruskin, the greatest of all 19th century art critics, did what he could to rescue Turner's reputation, but Turner's very last works confounded even his greatest defender. TURNER humanizes this surprising genius while placing him in his fascinating historical context. Franny Moyle brilliantly tells the story of the man to give us an astonishing portrait of the artist and a vivid evocation of Britain and Europe in flux.

More than two hundred illustrations, an illustrated chronology, and critical artistic analysis trace the life of the nineteenth-century British landscape painter, describes the influences on his remarkable work, and attempts to portray his complex and mysterious personality.

Download Ebook J M W Turner British Artists Series

J.M.W. Turner and the Subject of History is an in-depth consideration of the artist's complex response to the challenge of creating history paintings in the early nineteenth century. Structured around the linked themes of making and unmaking, of creation and destruction, this book examines how Turner's history paintings reveal changing notions of individual and collective identity at a time when the British Empire was simultaneously developing and fragmenting. Turner similarly emerges as a conflicted subject, one whose artistic modernism emerged out of a desire to both continue and exceed his eighteenth-century aesthetic background by responding to the altered political and historical circumstances of the nineteenth century.

1998 marks the 40th anniversary of the bequest to the British Museum by the collector, Robert Wylie Lloyd, of 50 of Turner's finest watercolours. This text is published to accompany an exhibition of the collection.

Examines the posthumous reception of Turner's work.

Turner's sketchbooks were private things which he kept to himself. They might live for some time in his coat pockets or travel bags, to be pulled out as need arose. In the studio, they served as memory banks for future work. Besides many watercolor studies of sky effects, the sketchbook reproduced within this unique publication also includes pencil sketches of places in London and the surrounding area. Turner drew and painted sky, clouds, and weather all his life. As a boy he liked to go up to Hampstead Heath in North London, lie on his back to draw the sky, and return to town to sell his day's work. Late in life he made many colored studies, often in Kent, which he believed had the finest skies in Europe. This edition of the sketchbook reproduces all these beautiful drawings and watercolors in facsimile, with an illustrated introduction by Turner expert David Blayney Brown discussing their background and impact.

This Art Book contains 132 selected annotated reproductions of watercolors and paintings from J. M. W. Turner. Joseph Mallord William Turner was English artist, one of the greatest and most imaginative painters who put on a pedestal landscape painting. Although renowned for his oils, he is as well one of the coryphées of British watercolor landscape painting. Having been skilled academically, Turner seemed to spend the rest of his life developing an ever more loose style. He uncompromisingly studied nature and light. For his manner of painting he says: "My job is to draw what I see, not what I know." He had a extraordinary production of drawings and paintings; upon his death, he left nearly 30,000 pieces of his art work. He is usually known as "the painter of light" and his work is considered as a Romantic prelude to Impressionism.
