This is the first academic study of Christian literature in Hindi and its role in the politics of language and religion in contemporary India. In public portrayals, Hindi has been the language of Hindus and Urdu the language of Muslims, but Christians have been usually associated with the English of the foreign 'West'. However, this book shows how Christian writers in India have adopted Hindi in order to promote a form of Christianity that can be seen as Indian, des?, and rooted in the religio-linguistic world of the Hindi belt. Using three case studies, the book demonstrates how Hindi Christian writing strategically presents Christianity as linguistically Hindi, culturally Indian, and theologically informed by other faiths. These works are written to sway public perceptions by promoting particular forms of citizenship in the context of fostering the use of Hindi. Examining the content and context of Christian attention to Hindi, it is shown to have been deployed as a political and cultural tool by Christians in India. This book gives an important insight into the link between language and religion in India. As such, it will be of great interest to scholars of Religion in India, World Christianity, Religion and Politics and Interreligious Dialogue, as well as Religious Studies and South Asian Studies.

Investigates the professional practices of astrologers in urban India and their popularity among the educated middle and upper classes. Astrologers play an important role in Indian society, but there are very few studies on their social identity and professional practices. Based on extensive fieldwork carried out in the city of Banaras, *Words of Destiny* shows how the Brahmanical scholarly tradition of astral sciences (jyotiṣtra) described in Sanskrit literature and taught at universities has been adapted and reformulated to meet the needs and questions of educated middle and upper classes in urban India: How to get a career promotion? How to choose the most suitable field of study for children? When is the best moment to move into a new house? The study of astrology challenges ready-made assumptions about the boundaries between "science" and "superstition," "rationality" and "magic." Rather than judging the validity of astrology as a knowledge system, Caterina Guenzi explores astrological counseling as a social practice and how it "works from within" for both astrologers and their clients. She examines the points of view of those who use astrology either as a way of earning their living or as a means through which to solve problems and make decisions, concluding that, because astrology combines mathematical calculations and astronomical observations with ritual practices, it provides educated urban families with an idiom through which modern science and devotional Hinduism can be subsumed. Caterina Guenzi is Associate Professor at the École des Hautes Études en Sciences Sociales (EHESS) and member of the Center for South Asian Studies in Paris. Her previous books are available in their French editions.
