An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear. As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why. 2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list. Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started. Equal parts high concept and high action, the Filter Trap explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart.

Have you ever found yourself asking, “ Is this all there is to life? ” Or wondering if this bigger life you have created is actually a better life? And do you wonder how it all got so out of control? In her groundbreaking bestseller *The Not So Big House*, architect Sarah Susanka showed us a new way to inhabit our houses by creating homes that were better – not bigger. Now, in *The Not So Big Life*, Susanka takes her revolutionary philosophy to another dimension by showing us a new way to inhabit our lives. Most of us have lives that are as cluttered with unwanted obligations as our attics are cluttered with things. The bigger-is-better idea that triggered the explosion of McMansions has spilled over to give us McLives. For many of us, our ability to find the time to do what we want to do has come to a grinding halt. Now we barely have time to take a breath before making the next call on our cell phone, while at the same time messaging someone else on our Blackberry. Our schedules are chaotic and overcommitted, leaving us so stressed that we are numb, yet we wonder why we cannot fall asleep at night. In *The Not So Big Life*, Susanka shows us that it is possible to take our finger off the fast-forward button, and to our surprise we find how effortless and rewarding this change can be. We do not have to lead a monastic life or give up the things we love. In fact, the real joy of leading a not so big life is discovering that the life we love has been there the entire time. Through simple exercises and inspiring stories, Susanka shows us that all we need to do is make small shifts in our day – subtle movements that open our minds as if we were finally opening the windows to let in fresh air. *The Not So Big Life* reveals that form and function serve not only architectural aims but life goals as well. Just as we can tear down interior walls to reveal space, we can tear down our fears and assumptions to open up new possibilities. The result is that we quickly discover we have all the space and time we need for the things in our lives that really

matter. But perhaps the greatest reward is the discovery that small changes can yield enormous results. In her elegant, clear style, Susanka convinces us that less truly is more – much more.

In this evocative and affectionate memoir, Ambassador Jean Kennedy Smith, the last surviving child of Joe and Rose Kennedy, offers an intimate and illuminating look at a time long ago when she and her siblings, guided by their parents, laughed and learned a great deal under one roof. Prompted by interesting tidbits in the newspaper, Rose and Joe Kennedy would pose questions to their nine children at the dinner table. "Where could Amelia Earhart have gone?" "How would you address this horrible drought?" "What would you do about the troop movements in Europe?" It was a nightly custom that helped shape the Kennedys into who they would become. Before Joe and Rose's children emerged as leaders on the world stage, they were a loving circle of brothers and sisters who played football, swam, read, and pursued their interests. They were children inspired by parents who instilled in them a strong work ethic, deep love of country, and intense

appreciation for the sacrifices their ancestors made to come to America. "No whining in this house!" was their father ' s regular refrain. It was his way of reminding them not to complain, to be grateful for what they had, and to give back. In her remarkable memoir, Kennedy Smith—the last surviving sibling—revisits this singular time in their lives. Filled with fascinating anecdotes and vignettes, and illustrated with dozens of family pictures, *The Nine of Us* vividly depicts this large, close-knit family during a different time in American history. Kennedy Smith offers indelible, elegantly rendered portraits of her larger-than-life siblings and her parents. "They knew how to cure our hurts, bind our wounds, listen to our woes, and help us enjoy life," she writes. "We were lucky children indeed."
