Researcher and thought leader Dr. Brené Brown offers a powerful new vision in *Daring Greatly* that encourages us to embrace vulnerability and imperfection, to live wholeheartedly and courageously. 'It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat

and blood, who strives valiantly; . . . who at best knows in the end the triumph of high achievement, and who at worst, if he fails, at least fails while daring greatly' -Theodore Roosevelt Every time we are introduced to someone new, try to be creative, or start a difficult conversation, we take a risk. We feel uncertain and exposed. We feel vulnerable. Most of us try to fight those feelings - we strive to appear perfect. Challenging everything we think we know about vulnerability, Dr. Brené Brown dispels the widely accepted myth that it's a weakness. She argues that vulnerability is in fact a strength, and when we shut ourselves off from revealing our true selves we grow distanced from the things that bring

Transhumance is a form of pastoralism that has been practised around the world since animals were first domesticated. Such seasonal movements have formed an important aspect of many European farming systems for several thousand years, although they have declined markedly since the nineteenth century. Ethnographers and geographers have long been involved in recording transhumant practices, and in the last two decades archaeologists have started to add a new material dimension to the subject. This volume brings together recent advances in the study of European transhumance during historical times, from Sweden to Spain, Romania to

Ireland, and beyond that even Newfoundland. While the focus is on the archaeology of seasonal sites used by shepherds and cowherds, the contributions exhibit a high degree of interdisciplinarity. Documentary, cartographic, ethnographic and palaeoecological evidence all play a part in the examination of seasonal movement and settlement in medieval and post-medieval landscapes. Notwithstanding the obvious diversity across Europe in terms of livestock, distances travelled and socio-economic context, an extended introduction to the volume shows that cross-cutting themes are now emerging, including mobility, gendered herding, collective land-use, the agency of non-elite people and competition for grazing and
