Classified list with author and title index.

Covers the period from 1790 to 1905 in The Times of London.

The South African labour market has undergone unparalleled reformations since 1994. This textbook, which is up to date with all the current legislation, provides a comprehensive text for students at tertiary institutions. It is also a valuable reference for Industrial Relations practitioners.

Contains a wealth of detail on globalization, people's values and attitudes, governance and civil liberties, plus a chronology of the conferences, campaigns and protests that are the sinews of global civil society.

Kirsten Sehnbruch uses the case study of Chile to show the failures and inner-working of neo-liberal labour policy. She shows in detail what the real policy issue should be, namely the creation of proper institutions and of a corps of competent professionals with relevant skills and powers to operate them.

The use of the cognitive interviewing method for survey question testing has proliferated and evolved over the past 30 years. In more recent years the method has been applied to the evaluation of information letters and leaflets and to research consent forms. This book provides a practical handbook for implementing cognitive interviewing methods in the context of applied social policy research, based on the approach used by the authors at the NatCen Social Research (NatCen) where cognitive interviewing methods have been used for well over a decade. The book provides a justification for the importance of question testing and evaluation and discusses the position of cognitive interviewing in relation to other questionnaire development and evaluation techniques. Throughout the book, the focus is on

providing practical and hands-on guidance around elements such as sampling and recruitment, designing probes, interviewing skills, data management and analysis and how to interpret the findings and use them to improve survey questions and other documents. The book also covers cognitive interviewing in different survey modes, in cross national, cross cultural and multilingual settings and discusses some other potential uses of the method.

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.
