Insects will be appearing on our store shelves, menus, and plates within the decade. In The Insect Cookbook, two entomologists and a chef make the case for insects as a sustainable source of protein for humans and a necessary part of our future diet. They provide consumers and chefs with the essential facts about insects for culinary use, with recipes simple enough to make at home yet boasting the international flair of the world's most chic dishes. Insects are delicious and healthy. A large proportion of the world's population eats them as a delicacy. In Mexico, roasted ants are considered a treat, and the Japanese adore wasps. Insects not only are a tasty and versatile ingredient in the kitchen, but also are full of protein. Furthermore, insect farming is much more sustainable than meat production. The Insect Cookbook contains delicious recipes; interviews with top chefs, insect farmers, political figures, and nutrition experts (including chef René Redzepi, whose establishment was elected three times as "best restaurant of the world"; Kofi Annan, former secretary-general of the United Nations; and Daniella Martin of Girl Meets Bug); and all you want to know about cooking with insects, teaching twenty-first-century consumers where to buy insects, which ones are edible, and how to store and prepare them at home and in commercial spaces.

I-SMART A SAFE AND CONVENIENT CITY WHERE THE ECONOMIC LIVES ARE BALANCED... WE CALL IT A 'SMART CITY.' AND TODAY, THE WORLD SEES SONGDO AS THE KEY MODEL FOR SMART CITIES AND RATES ITS EXCELLENCE HIGHLY.

"Hormegeddon" is the term coined by entrepreneur and New York Times Bestselling Author Bill Bonner to describe what happens when you get too much of a good thing in the sphere of public policy, economics and business. Simply put, it ends in disaster. Drawing on stories and examples from throughout modern political history—from Napoleon's invasion of Russia to the impending collapse of the American healthcare system, from the outbreak of WWII and the fall of the Third Reich to the 21st century War on Terror, from the Great Recession to the sovereign debt crisis-Bonner pursues a modest ambition: to understand what goes wrong. History is not a clean yarn spun by its victors. It is a long tale of things that went FUBAR-debacles, disasters, and catastrophes. That each disaster carries with it a warning is what makes it useful to study. For instance, if the architect of a great ship tells you that "not even God himself could sink this ship," you should take the next boat. If the stock market is selling at 20 times earnings and all the expert analysts urge you to 'get in' because you 'can't lose'-it's time to get out! Similarly, public policy disasters are what you get when well meaning people with this same Titanic degree of certitude apply rational, small-scale problem-solving logic to inappropriately large scale planning. First, you get a declining rate of return on your investment (of time or resources) until you hit zero. Then, if you keep going through the zero floor-and you always keep going-you get a disaster. The problem is, these disasters cannot be stopped by well-informed smart people with good intentions, because they are the people who cause them in the first place. From the mind of Bill Bonner comes Hormegeddon, a phenomenon that occurs when a small dose of something produces a favorable result, but if you increase the dosage, the results end in disaster. The same applies when the world gets too much of a good thing in public policy, economics, and business. Drawing on examples throughout modern political history, Bonner brings context and understanding to this largely ignored and anonymous phenomenon.

Watch out for Nancy Atherton's latest, Aunt Dimity and the King's Ransom, coming in July 2018 from Viking! Last year, the otherworldly sleuth's devoted fans secured a place on the New York Times bestseller list for Nancy Atherton's Aunt Dimity and the Family Tree.
