The purpose of this Springer Brief is to provide a comprehensive review of both the STEBI methods and findings through the use of a clearly defined analytic framework. A systematic review of literature yielded 107 STEBI-A research items and 140 STEBI-B research items. The STEBI instruments have been used in a wide range of qualitative, cross-sectional, longitudinal and experimental designs. Analysis of the findings of the papers reveals that in-service and pre-service programs that use innovative practices such as cooperative learning, inquiry based investigation and nature of science instruction can produce positive growth in participants ' science teaching efficacy beliefs. The personal science teaching efficacy beliefs of pre-service and in-service teachers showed greater mean scores and higher growth than their outcome expectancies. Implications are discussed.

This book, Teaching Learners with Visual Impairment, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Students come to the school library every day with questions ranging from " How many people live in China?" to " I need to find out how the Sun began for my science paper. " Helping students find the answers to their questions is one of the most important responsibilities school librarians have. In Introduction to Reference and Information Services in Today's School Library, one of America ' s premier school library educators covers the A-Z of both reference and information services for today ' s library. Everything from teaching students how to use sources to both in-person and virtual reference service is covered. A key feature of the text is an annotated bibliography of core print and electronic sources for elementary, middle, and high school collections. Yes, reference and information services are vital library functions in the digital age. Even students who appear to be tech savvy have trouble finding the right information efficiently - and knowing what to do with it. This book examines information needs and behaviors, and provides strategies for assessing and meeting the informational needs of the school community. The book also addresses the conditions for optimum service: physical access (including virtual access), effective interaction and collaboration, instructional design, and systematic planning. Newer issues such as embedded librarianship, curation,collective intelligence, and web 2.0 intellectual property are also addressed. This book introduces the entering professional, and updates practitioners, to current standards and useful strategies.
