Local Dollars, Local Sense is a guide to creating Community Resilience. Americans' long-term savings in stocks, bonds, mutual funds, pension funds, and life insurance funds total about \$30 trillion. But not even 1 percent of these savings touch local small business—even though roughly half the jobs and the output in the private economy come from them.

Describes the potential for local investment, how it impacts small businesses across America, and the federal regulations limiting such investment.

"As so many Americans feel powerless to confront a financial system designed to serve the few, Shuman offers us real choices: tools that align our lives with our values. That's power. I love this highly readable, timely, surprising book." —Frances Moore Lappé, author of *Daring Democracy* and *Diet for a Small Planet* Americans agree on very little these days, but red state conservatives and blue state

progressives can agree on one critical point: Wall Street can no longer be trusted. Yet most of us continue to invest our money in the stocks and bonds of Fortune 500 companies, transferring our capital far from where we live and work. Local investing expert Michael Shuman offers another alternative. He shows how we can use two well-established-but rarely used-investment tools to keep our money close and get a return as good as or better than what we'd get investing in distant, indifferent corporations. Shuman explains the nuts and bolts of self-directed IRAs and solo 401(k)s and how they can be combined with other recently legalized local investing tools. He details how to set these accounts up, identify and evaluate a whole range of local investment opportunities, and make sure account holders stay on the right side of the law. While the book is written for people without a lot of investment experience-Shuman explains concepts like "liquidity" and "diversification" in simple terms-even if you're as experienced as Warren Buffett, this book will make you rethink everything you know about investing. With Shuman's expert advice, you can strengthen your investment portfolio and your community, neighborhoods, and schools at the same time!

Reinventing economic development as if small business mattered In cities and towns across the nation, economic development is at a crossroads. A growing body of evidence has proven that its current cornerstone-incentives to attract and retain large, globally mobile businesses-is a dead end. Even those programs that focus on local business, through buy-local initiatives, for example, depend on ongoing support from government or philanthropy. The entire practice of economic development has become ineffective and unaffordable and is in need of a makeover. The Local Economy Solution suggests an alternative approach in which states and cities nurture a new generation of special kinds of businesses that help local businesses grow. These cutting-edge companies, which Shuman calls "pollinator businesses," are creating jobs and the conditions for future economic growth, and doing so in self-financing ways. Pollinator businesses are especially important to communities that are struggling to lift themselves up in a period of economic austerity, when municipal budgets are being slashed. They also promote locally owned businesses that increase local self-reliance and evince high labor and environmental standards. The book includes nearly two dozen case studies of successful pollinator businesses that are creatively facilitating business and neighborhood improvements, entrepreneurship, local purchasing, local investing, and profitable business partnerships. Examples include Main Street Genome (which provides invaluable data to improve local business performance), Supportland (which is developing a powerful loyalty card for local businesses), and Fledge (a business accelerator that finances itself through royalty payments). It also shows how the right kinds of public policy can encourage the spread of pollinator businesses at virtually no cost.

Bartik provides a clear and concise overview of how state and local governments employ economic development incentives in order to lure companies to set up shop-and provide new jobs-in needy local labor markets. He shows that many such incentive offers are wasteful and he provides guidance, based on decades of research, on how to improve these programs.

Global news on anthropogenic climate change is shaped by international politics, scientific reports and voices from transnational protest movements. This timely volume asks how local communities engage with these transnational discourses. The chapters in this volume present a range of compelling case studies drawn from a broad cross-section of local communities around the world, reflecting diverse cultural and geographical contexts. From Greenland to northern Tanzania, it illuminates how different understandings evolve in diverse cultural and geographical contexts while also revealing some common patterns of how people make sense of climate change. Global Warming in Local Discourses constitutes a significant, new contribution to understanding the multi-perspectivity of our debates on climate change, further highlighting the need for interdisciplinary study within this area. It will be a valuable resource to those studying climate and science communication; those interested in understanding the various roles played by journalism, NGOs, politics and science in shaping public understandings of climate change, as well as those exploring the intersections of the global and the local in debates on the sustainable transformation of societies.

If you want to build a better life and a better world-and really be prepared for any possible future in these turbulent times-you need to become a resilient investor! This trailblazing guide will expand your ideas of investing way beyond Wall Street. Your time, your energy, and the things you own are investments too, and you'll learn to diversify them in ways that move you toward your life goals. The Resilient Investment Map lays out all your assets-personal and physical as well as financial-and then provides three essential, timely strategies (Close to Home, Sustainable Global Economy, and Evolutionary Investing) that will help you grow each of them. The goal is to become more resilient: able to anticipate disturbance, rebuild as necessary, and improve when possible. You'll discover that the choices making you more resilient also enhance our communities, our economy, and the planet-building real wealth for all.

From disappearing livelihoods to financial instability, from climate chaos to an epidemic of depression, we face crises on a number of seemingly unrelated fronts. This well-referenced book traces the common roots of these problems in a globalized economy that is incompatible with life on a finite planet. But Local is Our Future does more than just describe the problem: it describes the policy shifts and grassroots steps - many of them already underway around the world - that can move us towards the local and, thereby, towards a better world.

Local newspapers can hold back the rising tide of political division in America by turning away from the partisan battles in Washington and focusing their opinion page on local issues. When a local newspaper in California dropped national politics from its opinion page, the resulting space filled with local writers and issues. We use a pre-registered analysis plan to show that after this quasi-experiment, politically engaged people did not feel as far apart from members of the opposing party, compared to those in a similar community whose newspaper did not change. While it may not cure all of the imbalances and inequities in opinion journalism, an opinion page that ignores national politics could help local newspapers push back against political polarization.
