In *Political Literacy in Composition and Rhetoric*, Donald Lazere calls for revival of NCTE resolutions in the 1970s for teaching the “critical reading, listening, viewing, and thinking skills necessary to enable students to cope with the persuasive techniques in political statements, advertising, entertainment, and news,” and explores the reasons these goals have been eclipsed in composition studies over recent decades. Obstacles to those goals have included the emphasis in the profession on basic and first year writing at the expense of more advanced study in argumentative rhetoric, and on the privileging of students’ personal writing over critical study of both academic and political discourse. Lazere further argues that theorists who legitimately champion students’ pluralistic local communities sometimes fail to recognize that liberal education can enable students to grow beyond their home cultures to critical awareness of national and international politics. Finally, he argues that the fixation in recent composition studies on liberally-inclined students and communities “on the margins” has eclipsed attention to the conservative conformity long prevalent in mainstream American society and education. His proposals for curriculum and pedagogy seek to introduce students to a more highly-informed, cogent, and open-ended level of debate between the political left and right.

Is it true that "numbers don't lie?" Is America "the land of equal opportunity?" Is marriage a "dying institution?" Each of the 23 essays in *Second Thoughts* reviews a familiar conventional wisdom, and introduces relevant sociological concepts and theories in order to explain, qualify, and sometimes debunk that conventional wisdom.

Studies on human thinking have focused on how humans solve a problem and have discussed how human thinking can be rational. A juxtaposition between psychology and sociology allows for a unique perspective of the influence on human thought and morality on society. *Adapting Human Thinking and Moral Reasoning in Contemporary Society* is an in-depth critical resource that provides comprehensive research on thinking and morality and its influence on societal norms as well as how people adapt themselves to the novel circumstances and phenomena that characterize the contemporary world, including low birthrate, the reduction of violence, and globalization. Furthermore, cultural differences are considered with research targeted towards problems specific to a culture. Featuring a wide range of topics such as logic education, cognition, and knowledge management systems, this book is ideal for academicians, sociologists, researchers, social scientists, psychologists, and students.

This book addresses two questions: what makes an argument persuasive and what makes a claims that support them plausible?

*Ethics and Technology, 5th Edition*, by Herman Tavani introduces students to issues and controversies that comprise the relatively new field of cyberethics. This text examines a wide range of cyberethics issues--from specific issues of moral responsibility that directly affect computer and information technology (IT) professionals to broader social and ethical concerns that affect each of us in our day-to-day lives. The 5th edition shows how modern day controversies created by emerging technologies can be analyzed from the perspective of standard ethical concepts and theories. -- Provided by publisher.
