Thoroughly updated for its Second Edition, this comprehensive reference provides clear, practical guidelines on documenting patient care in all nursing practice settings, the leading clinical specialties, and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals, and new information on charting pain management. Hundreds of filled-in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards, and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards, and documenting outcomes and interventions for key nursing diagnoses.

From pain assessment methods to intravenous drip calculations, the Long-Term Care Nursing Desk Reference offers long-term care nurses virtually every tool they need to provide high-quality, regulation-compliant, long-term resident care. Written by accomplished author and speaker Barbara Acello, MS, RN, this authoritative reference is jam-packed with practical, need-to-know patient care information, essential policies and procedures, and vital regulatory and safety requirements. In short, the Long-Term Care Nursing Desk Reference is the book you and your nurses have been waiting for!

"Written for long-term care administrators, nursing directors, health information managers, privacy and security managers and educators, this book provides a comprehensive overview and explains specific medicare and medicall reporting requirements related to long-term care."

"This resource will help you: Align with MDS 3.0 documentation requirements. Coordinate documentation between nurses and therapists to improve resident care. Gain the perspective of nursing or therapy to appreciate their specific approach to skilled services. Reduce your audit risk and strenthen reimbursement claims with comprehensive documentation. Prove medical necessity and need for skilled care by practicing accurate documentation"--P. [4] of cover.

An excellent resource for new or seasoned NPs and PAs! The Nurse Practitioner in Long-Term Care addresses the growing trend to utilize the nurse practitioner in the skilled nursing facility (SNF) to manage patients in long-term care and serves as a practical resource for managing those conditions commonly encountered in the geriatric patient. It includes an introduction to nursing homes, medication management, practical health promotion/disease prevention, and management of common clinical conditions specific to the skilled and long term care nursing home settings. It will also address important topics such as elder abuse, legal issues, reimbursement, and regulatory issues. Subjects covered are pertinent to everyday practice and this text is useful in graduate programs for nurse practitioners and clinical nurse specialists as well as for physician's assistant (PA) students.

"Provides primary care providers with information specific to the medical management of acutely ill adult and elder patients with multiple comorbid health problems. It also contains material on advanced directives, end of life care and regulatory and compliance concerns that often affect treatment decisions in these settings. A section on staff education is also included for nurse practitioners who are directing patient care given by both skilled and unskilled staff in subacute and long term care." --Cover.

This manual offers a quality documentation system using nursing diagnosis developed specifically for long-term care. it provides practical quality tools to guide professional nurses and interdisciplinary staff members in meeting documentation requirements under OBRA '87.

Helps you quickly and easily find the standards and scoring information you need. This title puts the accreditation requirements, policies, and procedures at your fingertips and includes scoring information at every element of performance.

Designed for rapid-on-the-job reference, Documentation in Action offers comprehensive, authoritative, practice-oriented, up-to-the-minute guidelines for documenting every situation in every nursing practice setting and important nursing specialties. Need-to-know information is presented in bulleted lists, charts, flow sheets, sidebars, and boxes, with icons and illustrative filled-in samples. Coverage includes documentation for care of patients with various diseases, complications, emergencies, complex procedures, and difficulties involving patients, families, and other health care professionals. Suggestions are given for avoiding legal pitfalls involving telephone orders, medication reconciliations, patients who refuse care, and much more. A section addresses computerized documentation, HIPAA confidentiality rules, use of PDAs, nursing informatics, and electronic innovations that will soon be universal.
