When did we lose our right to be lazy, unhealthy, and politically incorrect? Move over Big Brother! An insidious new group has inserted itself into American politics. They are the nannies—not the stroller-pushing set but an invasive band of do-gooders who are subtly and steadily stripping us of our liberties, robbing us of the inalienable right to make our own decisions, and turning America into a nation of children. As you read this, countless busybodies across the nation are rolling up their sleeves to do the work of straightening out your life. Certain Massachusetts towns have banned school-yard tag. San Francisco has passed laws regulating the amount of water you should use in dog bowls. The mayor of New York City has french fries and doughnuts in his sights. In some parts of California, smoking is prohibited . . . outside. The government, under pressure from the nanny minority, is twisting the public ’ s arm into obedience. Playground police, food fascists, anti-porn crusaders —whether they're legislating morality or wellbeing—nannies are popping up all over America. In the name of health, safety, decency, and—shudder—good intentions, these ever-vigilant politicians and social activists are dictating what we eat, where we smoke, what we watch and read, and whom

we marry. Why do bureaucrats think they know what's better for us than we do? And are they selectively legislating in the name of political expediency? For instance, why do we ban mini-motorbikes, responsible for five deaths each year, and not skiing, which accounts for fifty deaths each year? Why is medical marijuana, a substance yet to claim a single life, banned and not aspirin, which accounts for about 7,600 deaths? Exhaustively researched, sharply observed, and refreshingly lucid, Nanny Sate looks at the myriad ways we are turning the United States into a soulless and staid nation—eroding not only our personal freedoms but our national character.

The Constitution was designed to limit government power and protect individuals from the tyranny of majorities and interest-group politics. But those protections are meaningless without judges who are fully committed to enforcing them, and America's judges have largely abdicated that responsibility. All too often, instead of judging the constitutionality of government action, courts simply rationalize it, as the Supreme Court did in upholding the Affordable Care Act, which represented the largest—and most blatantly unconstitutional—expansion of federal power since the New Deal. The problem lies not with the Constitution, but with courts' failure to properly enforce it. From the abandonment of federalism to open disregard for property rights and economic freedom, the Supreme Court consistently protects government prerogatives at the expense of liberty. The source of this error lies in the mistaken belief on both the left and the right that the leading constitutional value is majority rule and the chief judicial virtue is reflexive deference to other branches of government. This has resulted in a system where courts actually judge the constitutionality of government action in the handful of cases they happen to care about, while merely pretending to judge in others. The result has been judicial abdication, removing courts from their essential role in the system of checks and balances so carefully crafted by our Founders. This book argues that principled judicial engagement—real judging in all cases with no exceptions—provides the path back to constitutionally limited government.

A comprehensive treatment of the environmental physiology and ecology of fruit and seed production in higher plants.

Lay the groundwork for your success on the Landscape Architect Registration Examination (L.A.R.E.)! Successful completion of the Landscape Architect Registration Examination (L.A.R.E.) is your key to licensure as a landscape architect. Written by the creator and producer of the L.A.R.E. for the past sixteen years, Everything You Need to Know About the L.A.R.E. will fully prepare you to do your very best on the exam. Drawing on his extensive expertise in both landscape architecture and the L.A.R.E. exam itself, Clarence Chaffee explains how the test is prepared and scored, and what content you can expect on it. He also gives you valuable insight into the exam weighting and strategies you can follow to achieve the maximum score on the test. Chaffee walks you through every step of preparing for the exam, telling you how to: Sign-up for the exam Create a personalized strategy for passing the test Employ specific problem-solving strategies to earn maximum points Understand the design and weighting of problems Correctly interpret instructions and codes Think like a grader Avoid wasting time on aspects that graders don't consider There is no more authoritative, easy-to-follow guide to the L.A.R.E. Read it, follow its advice, and you will be confidently prepared to demonstrate all the knowledge and skill needed for the Landscape Architect Registration Exam and receive your license to practice as a Landscape Architect.

For nearly fifty years, this classic book has led the way in floral design. Flowers: Creative Design contains hundreds of suggestions on new, simpler, and quicker methods of constructing floral pieces. Detailed instructions, profusely illustrated with more than 380 photographs and 150 sketches in progressive steps, will enable the experienced and not so experienced to produce work of professional quality. This volume contains a wealth of information everyone, regardless of skill level, can use to add the elegance of flowers to their life. Florists, amateurs, hobbyists, instructors, wedding and party planners, and those who simply appreciate beauty will be taken with the wealth of information in Flowers: Creative Design.

Keeping It Living brings together some of the world's most prominent specialists on Northwest Coast cultures to examine traditional cultivation practices from Oregon to Southeast Alaska. It explores tobacco gardens among the Haida and Tlingit, managed camas plots among the Coast Salish of Puget Sound and the Strait of Georgia, estuarine root gardens along the central coast of British Columbia, wapato maintenance on the Columbia and Fraser Rivers, and tended berry plots up and down the entire coast. With contributions from a host of experts, Native American scholars and elders, Keeping It Living documents practices of manipulating plants and their environments in ways that enhanced culturally preferred plants and plant communities. It describes how indigenous peoples of this region used and cared for over 300 species of plants, from the lofty red cedar to diminutive plants of backwater bogs.

Lists the certificate and licensing requirements for certain professions by state and federal agencies
