Dornbusch, Fischer, and Startz Macroeconomics has been a leading intermediate macroeconomic theory text since its introduction in 1978. This revision retains most of the texts traditional features, including a middle-of-the-road approach and very current research, while updating and simplifying the exposition. The text is now even easier to teach from. The only prerequisite continues to be principles of economics.

Fully updated, this classic best-seller presents a modern view of macroeconomics at a level accessible for students.

The combination of David Begg with new co-author Gianluigi Vernasca is one of the many reasons that the 10th edition of Economics stands out from the crowd. After extensive research, they have revised the structure of the book to make it more concise, perfected their rigorous yet accessible approach, updated data throughout and created over 80 new example boxes. The result is a textbook fully equipped with everything you need to master your economics principles course.
