It has never been more important for businesses to operate within a framework of strategic planning and decision making. This popular introductory text teaches you how to make the best choices in managerial and other business roles. This text is aimed at undergraduate students who wish to grasp key elements of management accounting and those seeking a foundation for further study. New to this edition · Expanded discussion of relevant costs for decision making · Increased coverage of cost management in a competitive environment · Increased coverage of inventories' management techniques · New chapter on managing risk · More activities throughout the text to enhance reader interaction and to encourage critical thinking. · More diagrams and real world examples to help illustrate issues and concepts

This introductory text covers the basic principles and underlying concepts with a strong practical emphasis and plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.

Written with the decision maker in mind, this new text from Professor Will Seal, author of the highly successful Management Accounting, takes a practical, real-world approach to the subject. Suitable for one or two semester courses, the text is aimed at both specialist and non-specialist students at an introductory level. The book provides concise and manageable coverage of key topics and theory, and is supported by contemporary examples from both the manufacturing and services industries, ensuring it is relevant and engaging to both today's students and tomorrow's decision makers.

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.
