NRICH — Mathematics Resources for Teachers, Parents and —

With exams nearly over and schemes of work coming to an end, there may be time to do something slightly different in maths lessons. Perhaps an investigation to apply the knowledge and skills students have acquired over the year, a project to allow them to work creatively as a team to produce something special, or an enrichment activity to show pupils just how interesting maths can be.

Great Extension Tasks — Back to Front Maths | Kennedy —

Art teacher Melinda Nguyen spent mornings at her former school, Nesbit Elementary in Tucker, Georgia, assisting in a math extension program called Mighty Minds. As part of the program, she worked with a second-grade teacher to explain "make 10" addition, but the students weren't grasping the concept. So Nguyen decided to try something different. She guided the students in creating mosaics, which required an understanding of make 10 addition.

Huge List of Mathematics Projects, 2015 Latest Mathematics Science Fair Project Ideas, Maths Topics GCSE CBSE, Mathematics lab, additional project work, maths model project ideas for cbse high school, cool easy experiments for Kids and also for Middle school, Elementary School for class 5th Grade, 6th, 7th, 8th, 9th, 10th, 11th, 12th Grade and High School, MSC and College Students.

Each easy-to-implement project includes background information for the teacher, project goals, math skills needed, a student guide with tips and strategies, and reproducible worksheets. Projects are designed to help students meet the National Council of Teachers of Mathematics Standards and Focal Points, and chapters are organized to show how math relates to language, arts, science, etc.—demonstrating the importance of math in all areas of real life. In Part I, Chapter 1 offers an overview of how to incorporate math projects in the classroom. Chapter 2 provides a variety of classroom management suggestions, as well as teaching tips, and Chapter 3 offers ways teachers may evaluate project work. Each chapter also contains several reproducibles that are designed to help students master the procedural skills necessary for effective collaboration while working on projects. Part II, "The Projects," is divided into six separate sections: Section 1. Math and Science Section 2. Math and Social Studies Section 3. Math and Language Section 4. Math and Art and Music Section 5. Math and Fun and Recreation Section 6. Math and Life Skills

Teach basic math skills like negative numbers, percentages, and decimals using word problems! Your students' reading skills will be strengthened as they learn basic math operations and critical thinking skills. The word problems included in this book are interesting enough to hold student attention, yet challenging enough to strengthen math skills. This book is designed to be completed by the student with little or no help from a parent or teacher which makes it a great resource for use at home or school.

Did you ever wake up to one of those days where everything is a problem? You have 10 things to do, but only 30 minutes until your bus leaves. Is there enough time? You have 3 shirts and 2 pairs of pants. Can you make 1 good outfit? Then you start to wonder: Why does everything have to be such a problem? Why do 2 apples always have to be added to 5 oranges? Why do 4 kids always have to divide 12 marbles? Why can't you just keep 10 cookies without someone taking 3 away? Why? Because you're the victim of a Math Curse. That's why. But don't despair. This is one girl's story of how that curse can be broken.

You had better not monkey around when it comes to place value. The monkeys in this book can tell you why! As they bake the biggest banana cupcake ever, they need to get the amounts in the recipe correct. There's a big difference between 216 eggs and 621 eggs. Place value is the key to keeping the numbers straight. Using humorous art, easy-to-follow charts and clear explanations, this book presents the basic facts about place value while inserting some amusing monkey business.

The purpose of this book is to help busy classroom teachers provide enrichment for those students who quickly grasp the mathematical concepts being taught and are ready to move on to more challenging units. The units include challenging activities that will require higher-level thinking and will broaden students' problem-solving skills. This book is a great resource for busy classroom teachers who need materials to extend learning opportunities for those students who quickly grasp the concepts covered in their grade level math curriculum. The book includes four units: place value, time and measurement, problem solving, and money. The units provide hours of activities that will allow students to work independently or in small groups to extend their knowledge and apply their skills. Each unit includes 13 to 14 attractive, reproducible worksheets and an assignment sheet, making this an easy way for instructors to provide challenging, enriching experiences for capable math students. For a more advanced version of math extension activities, see Math Extension Units Book 2—geometry, fractions, graphing, and problem solving. For other math units targeted toward the same goal, see Enrichment Units in Math Books 1, 2, and 3. Grades 2-3

This activity book of over 110 ready-to-use, reproducible pencil-to-paper worksheets are ideal for enrichment or for use as reinforcement. Perfect for use at school or as homework, they feature basic math skills including fractions, decimals, measurement, time, money, and much more.

Reading Their Way is a guide to a balanced literacy instruction program that incorporates research-based components and utilizes the best of the phonics and whole language approaches.

This activity book of over 110 ready-to-use, reproducible pencil-to-paper worksheets are ideal for enrichment or for use as reinforcement. Perfect for use at school or as homework, they feature basic math skills including fractions, decimals, measurement, time, money, and much more.
