The economics of education is a burgeoning area of study, employing increasingly sophisticated analytical tools to answer questions with high societal impact. Thus, the aim of this handbook is to provide readers with an up-to-date overview of the current state of the field of the economics of education and its main areas of research. This comprehensive handbook provides an authoritative overview of key theoretical and policy areas, covering topics like econometric methods for education economics, returns to education, competition in education provision, education and economic growth, and education and inequality. It reviews the current state of research from early childhood through postgraduate education as well as adult education and life-long learning. Offering a truly international perspective, the handbook benefits from a global group of contributors and attention to both developed and developing country contexts. The Routledge Handbook of the Economics of Education will be a valuable resource for advanced students, researchers, and policymakers across economics, education, and public policy.

This book, Teaching Learners with Visual Impairment, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.
