Master Dentistry is designed as a revision guide for dental students and presents the key elements of the curriculum in an easy-to-digest format. Based on sound educational principles, each volume in the series is fully illustrated throughout and is supported by extensive self-assessment questions which allow the reader to assess their own knowledge of the topic and perfect their exam techniques. This third edition has been fully updated throughout and addresses the restorative, paediatric and orthodontic aspects of dentistry. The Master Dentistry volumes are perfect for undergraduate students as well as post-graduates preparing for the MJDF in the UK or international equivalent, and the ORE. Information presented in a style which facilitates easy recall for examination purposes and a ready understanding of the subject. Key facts are highlighted and principles of diagnosis and management emphasised. Gives the reader a 'feel for the subject' and details essential communication skills. Offers practical guidance on how to prepare for exams and make best use of the time available. Perfect for BDS exam preparation and candidates taking the MJDF, ORE or other post-graduate exams. Law & Ethics Chapter has been awarded second postgraduate prize in the Dental Protection/Schülke 2012 Premier Awards. Reflects changes with regards to registration examinations, the development of specialist lists and the Overseas Registration Examination. Fully revised self-assessment material provided in the form of MCQs, EMQs, case histories, short notes, data interpretation, viva questions and picture questions – all of which integrate knowledge from across different chapters and focus the reader on decisions they will take in a given clinical situation.

Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Chronic inflammation such as seen in periodontitis and its bidirectional influence on the systemic health has been of increased interest for a decade. In this text book, we have explored the biological and genetic pathways by which periodontal diseases may influence these disease processes and vice versa. Occlusal rehabilitation using the MEAW technique for the effective treatment of class II deep bite malocclusion and the timely management of cleft lip and palate to benefit the holistic welfare of the patient are presented here. The book addresses the development of bioinspired functionally graded dental restorative materials and also a simulation method that can improve clinical durability and enhance the functional capability of the dentition and indirect prostheses. In conclusion, various pathways for the
