Also contains brochures, directories, manuals, and programs from various College of Engineering student organizations such as the Society of Women Engineers and Tau Beta Pi.

An overview of recombinant DNA techniques and surveys advances in recombinant molecular genetics, experimental methods and their results.

Dr. Poncellet and Dr. Hirsh eagerly developed an encyclopedic chapter for the 4th edition of the Guidebook for Clerkship Directors, and it seemed logical and proper to grow that chapter, which had been truncated for the Guidebook, into this book. They have assembled the leading international experts in the field of the medical school longitudinal integrated curriculum, who in turn have generated what we are sure will be considered the ultimate resource for these experiences. This book fills a significant void in the medical education literature.

Your manual to building and leading a culture of C.A.R.E. The ten van Stralen brothers built The Grounds Guys, their landscape management company, from the ground up. By establishing a “ culture of C.A.R.E. ” as the centerpiece of the organization, the brothers have experienced tremendous success, working together in unity and growing their concept into a multinational franchise brand. The Code of Care We show that we CARE, by putting the needs of our Customers first, by having a positive and helpful Attitude, and by treating everything and everyone with Respect. By living our code of values we Enjoy life in the process. C.A.R.E. Leadership shares the van Stralen brothers’ extraordinary story and shows how eight simple but powerful leadership principles derived from the code of C.A.R.E. will enable your company to thrive, too. It ’ s all about the culture, author Peter van Stralen argues, and each one of the principles—from “ Create a Remarkable Experience ” to “ Be Humble ” to “ Listen Well and Communicate with Respect ” —gets leaders one step closer to creating a team that is competent, fun, fulfilled, engaged, and committed to giving customers the best service possible. www.careleadership.ca @PetervanStralen @CareLeadership

"Ellen Glasgow considered *Vein of Iron*, published in 1935, to be her best work. "No novel has ever meant quite so much to me," she wrote a friend. The critics agreed; the book was favorably reviewed on the front page of the *New York Times Book Review* and outsold all but one other work of fiction in the year of its publication." "Opening in the years just before the First World War and laid in the Valley of Virginia, the book traces the experience of a family with four generations of strong women. Faced with a crisis when the bread-winner, a philosopher-minister, is defrocked for his unorthodox views, the women provide the "vein of iron" which carries the family through removal to Richmond (Queensboro in the book), through war and depression until the final return to the mountains."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
