Imagine a country where the right to vote is not guaranteed by the Constitution, where the candidate with the most votes loses, and where paperwork requirements and bureaucratic bungling disenfranchise millions. You're living in it. If the consequences weren't so serious, it would be funny. An eye-opening, fact-filled companion to the forthcoming PBS documentary starring political satirist and commentator Mo Rocca, *Electoral Dysfunction* illuminates a broad array of issues, including the Founding Fathers' decision to omit the right to vote from the Constitution—and the legal system's patchwork response to this omission; the battle over voter ID, voter impersonation, and voter fraud; the foul-ups that plague Election Day, from ballot design to contested recounts; the role of partisan officials in running elections; and the anti-democratic origins and impact of the Electoral College. The book concludes with a prescription for a healthy voting system by Heather Smith, president of Rock the Vote. Published in the run-up to the 2012 election, *Electoral Dysfunction* is for readers across the political spectrum who want their votes to count.

This manual, first published in 1943, has been indispensable to ships engineers for generations. The third edition, revised and updated by a team of marine engineers/professors, follows in the venerable style of its predecessors. Text relating to obsolete equipment has been eliminated, information on systems that are still current has been updated, and new material has been added to reflect innovations in equipment and operative practices. Extensive coverage on the newest medium-speed diesel engine has been added to the text. Environmental concerns have been recognized with a section on engine exhaust emissions and information about new refrigerants and the maintenance of refrigeration systems. New equipment for trash handling, sewage processing, bilge water discharge, and incineration are discussed with reference to international regulations. Ship trial procedures and the new equipment used in trial data collection are presented in detail.

The New York Times bestselling author of *The Benedict Option* draws on the wisdom of Christian survivors of Soviet persecution to warn American Christians of approaching dangers. For years, émigrés from the former Soviet bloc have been telling Rod Dreher they see telltale signs of "soft" totalitarianism cropping up in America--something more *Brave New World* than *Nineteen Eighty-Four*. Identity politics are beginning to encroach on every aspect of life. Civil liberties are increasingly seen as a threat to "safety". Progressives marginalize conservative, traditional Christians, and other dissenters. Technology and consumerism hasten the possibility of a corporate surveillance state. And the pandemic, having put millions out of work, leaves our country especially vulnerable to demagogic manipulation. In *Live Not By Lies*, Dreher amplifies the alarm sounded by the brave men and women who fought totalitarianism. He explains how the totalitarianism facing us today is based less on overt violence and more on psychological manipulation. He tells the stories of modern-day dissidents--clergy, laity, martyrs, and confessors from the Soviet Union and the captive nations of Europe--who offer practical advice for how to identify and resist totalitarianism in our time. Following the model offered by a prophetic World War II-era pastor who prepared believers in his Eastern European to endure the coming of communism, *Live Not By Lies* teaches American Christians a method for resistance: • SEE: Acknowledge the reality of the situation. • JUDGE: Assess reality in the light of what we as Christians know to be true. • ACT: Take action to protect truth. Aleksandr Solzhenitsyn famously said that one of the biggest mistakes people make is assuming totalitarianism can't happen in their country. Many American Christians are making that mistake today, sleepwalking through the erosion of our freedoms. *Live Not By Lies* will wake them and equip them for the long resistance.

The Cognitive Behavioral Intervention for Trauma in Schools program is designed to help students exposed to traumatic events who are experiencing emotional or behavioral problems. The new edition provides updates from two decades of field experience.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute

description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

Vols. for 1970-71 includes manufacturers' catalogs.
