The 15 cm sIG 33 (schweres Infanterie Geschütz 33, lit."Heavy Infantry Gun") was the standard German heavy infantry gun used in the Second World War.It was the largest weapon ever classified as an infantry gun by any nation. Its weight made it difficult to use in the field, and the gun was increasingly adapted to various ad hoc mobile mountings. These were generically referred to as the SIG 33

The 'Bison' and 'Grille' are today's commonly used names for the German self-propelled 15cm schwere Infanteriegeschütz 33 (sIG 33) vehicles of World War II. The sIG 33 was the most powerful support weapon for the German infantry at the beginning of the war and from 1940 it was mounted on a range of tracked vehicles. This book demonstrates the construction of five 1/35-scale models of specific examples of the various self-propelled sIG 33 vehicles. The modeller is led through the various skill levels of construction by combining existing kits with some aftermarket accessories and scratch-built items.

The 'Bison' and Grille' are today's commonly used names for the German self-propelled 15cm schwere Infanteriegeschütz 33 (sIG33) vehicles of World War II. The sIG33 was the most powerful support weapon for the German infantry at the beginning of the war, and from 1940 it was mounted on a range of tracked vehicles. This title provides a detailed, step-by-step guide to modelling a 1/35-scale German self-propelled sIG33 Vehicle. The modeller is led through the various skill levels of construction by combining existing kits with some aftermarket accessories and scratch-built items. Key aspects such as finishing techniques, including painting and displaying your model are also covered. This guide forms part of Osprey Modelling 19 Modelling the German 15cm sIG33 Bison and Grille ebook.

Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title is a detailed modelling guide on the 'F05', Gruppe Fehrmann, Germany 1945 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

The Sturmgeschütz III proved to be one of the more significant German AFVs of World War II, with over 9,000 being produced up until April 1945. Originally designed in the late 1930s as a self-propelled infantry support gun, its role became more diverse throughout the war and it served as a tank hunter and in front-line Panzer companies. This title provides a detailed, step-by-step guide to modelling a 1/35-scale StuG III. It also provides a comprehensive list of available aftermarket products and kits of all scales. Key aspects such as finishing techniques, including painting and displaying your model are also covered. This guide forms part of Osprey Modelling 22 Modelling the Sturmgeschütz III ebook.
