Abandoned. Unwanted. Orphan.In a time of war between mankind and fae, no one ventures outside of the safety of the human kingdom. Abandoned in the furthest corner of Amnestia, in a convent long forgotten by most, Cress grows up thinking she's nothing more than a human of horrendous skill and grace. One moment, the quiet countryside of Amnestia where she's been raised her whole life is devoid of any danger and the next, it's there. Powered by a strange magical spell, a castle appears seemingly from nowhere. Ruled by a court of fae few humans had ever laid eyes on and lived to tell the tale, Cress stumbles right into the center of three royal princes. There, she discovers that perhaps she's not a human at all, but a changeling--a fae child left behind in the ancient tradition of an extinct court. In the face of possible execution, she better hope she's a fae, because the worst thing a girl can be in the court of crimson is human.

The chemical aspects of materials processing used for electronic applications, e.g. Si, III-V compounds, superconductors, metallization materials, are covered in this volume. Significant recent advances have occurred in the development of new volatile precursors for the fabrication of III-V semiconductor and metal [Cu, W] films by OMCVD. Some fundamentally new and wide-ranging applications have been introduced in recent times. Experimental and modeling studies regarding deposition kinetics, operating conditions and transport as well as properties of films produced by PVD, CVD and PECVD are discussed. The thirty papers in this volume report on many other significant topics also. Research workers involved in these aspects of materials technology may find here some new perspectives with which to augment their projects.

From the New York Times Bestselling Author and Co-Star of Fox's American Grit comes a rare and powerful book on the art of being a sniper. Way of the Reaper is a step-by-step accounting of how a sniper works, through the lens of Irving's most significant kills - none of which have been told before. Each mission is an in-depth look at a new element of eliminating the enemy, from intel to luck, recon to weaponry. Told in a thrilling narrative, this is also a heart-pounding true story of some of the Reaper's boldest missions including the longest shot of his military career on a human target of over half a mile. In Iraq and Afghanistan, Nick Irving earned his nickname in blood, destroying the enemy with his sniper rifle and in deadly firefights behind a .50 caliber machine gun. He engaged a Taliban suicide bomber during a vicious firefight, used nearly silent sub-sonic ammo, and was the target of snipers himself. Way of the Reaper attempts to place the reader in the heat of battle, experiencing the same dangers, horrors and acts of courage Irving faced as an elite member of the 3rd Ranger Battalion, 75th Ranger Regiment, while also examining the personal ramifications of taking another life. Readers will experience the rush of the hunt and the dangers that all snipers must face, while learning what it takes to become an elite manhunter. Like the Reaper himself, this explosive book blazes new territory and takes no prisoners.
