Are you trying to pass your anatomy class in college or high school? Do you need the extra practice? This book is meant to help students have a way of labeling pictures and learning the incredible anatomy of the body. With 70 anatomical pictures about the cardiovascular system you can practice, write, mark up, and use this practice book to have a further understanding of the muscular system of the body. \* Getting ready for a test \* Need extra help labeling \* Want a deeper understanding \* Help practice for your test \* Affordable study aid. How To Use....This book is meant to be used for you to label and practice the components of the muscular system. In going through your anatomy class and later in medical field you will need to know how to label the components, pictures of each system and know it inside and out. The best way is for you to label all the components that you know yourself and research the areas that you don't. Can you label all parts of the muscles, both deep and superficial, etc... Can you recognize a picture and know immediately what it is? You can find the corresponding picture in the table of contents. Nothing is labeled on purpose. This is for you to label. For you to know. And what you don't know for you to research in your texts and find the answers. Through this way of learning and researching the parts you don't know, allows you to actually learn it and have it stored in long term memory. This active way of learning will in the long term be beneficial beyond belief in your future career or knowledge. Mark the pages, make notes, and use this practice book and pictures to help you understand the parts of the anatomy.
