Paper modeling - or card modeling - is the art of constructing things with only colored, cut and folded pieces of paper. To help in constructing each model, you will need the free Adobe Reader to print the instructions and model parts. A link to adobe.com is provided with each model. Remember: Spacecraft construction is a team activity.

Universe Spacecraft Paper Models - NASA

Building paper models of spacecraft is a fun and interactive way to learn more about NASA's missions. Models are available for easy, moderate and more challenging skill sets. Each model has assembly instructions and printable parts; assembly requires printing, cutting, folding and gluing. Grab some scissors, glue and card stock and build your own spacecraft paper model! Universe Spacecraft Paper Models Chandra, Compton, Fermi, Gravity B, Hubble

DIY - Paper Spacecraft Models | Science Mission Directorate

This is our original paper model, designed by Nina Heimpel, at Swales Aerospace. Please also note that the design of the spacecraft has changed slightly since this was designed. There is a momentum flap on the back and the solar panel array has changed. The model is approximately 1/80th scale. The files you will need for building the model:

Orion - NASA 's new Orion spacecraft. Build it in time for the first flight test of the actual spacecraft in December 2014!

Spacecraft and Rockets Free Paper Toys - ss42.com

That 's way too big to fit in a rocket, so NASA has developed a way of folding it – like you would origami – for launch. In fact, NASA brought in origami experts to help create the perfect design. Follow their lead and make your own paper origami model of Starshade 's " inner disk optical shield " following the steps below.

"Fifty years after the founding of NASA, from 28 to 29 October 2008, the NASA History Division convened a conference whose purpose was a scholarly analysis of NASA's first 50 years. Over two days at NASA Headquarters, historians and policy analysts discussed NASA's role in aeronautics, human spaceflight, exploration, space science, life science, and Earth science, as well as crosscutting themes ranging from space access to international relations in space and NASA's interaction with the public. The speakers were asked to keep in mind the following questions: What are the lessons learned from the first 50 years? What is NASA's role in American culture and in the history of exploration and discovery? What if there had never been a NASA? Based on the past, does NASA have a future? The results of those papers, elaborated and fully referenced, are found in this 50th anniversary volume."--Introduction.

Two-volume collection of case studies on aspects of NACA-NASA research by noted engineers, airmen, historians, museum curators, journalists, and independent scholars. Explores various aspects of how NACA-NASA research took aeronautics from the subsonic to the hypersonic era.-publisher description.

Invites readers to join NASA astrobiologist Dr. Chris McKay on a fascinating quest to better understand what factors are necessary to sustain life on both Earth and beyond. Simultaneous.
