The essential volume on the great fashion designer, entrepreneur and Louis Vuitton artistic director, back in print This authoritative Virgil Abloh compendium, created by the designer himself, accompanies his acclaimed landmark 2019-23 touring exhibition and offers in-depth analysis of his career and his inspirations. More than a catalog, *Figures of Speech* is a 500-page user's manual to Abloh's genre-bending work in art, fashion and design. The first section features essays and an interview that examine Abloh's oeuvre through the lenses of contemporary art history, architecture, streetwear, high fashion and race, to provide insight into a prolific and impactful career that cuts across mediums, connecting visual artists, musicians, graphic designers, fashion designers, major brands and architects. The book also contains a massive archive of images culled from Abloh's personal files on major projects, revealing behind-the-scenes snapshots, prototypes, inspirations and more--accompanied by intimate commentary from the artist. Finally, a gorgeous full-color plate section offers a detailed view of Abloh's work across disciplines. Virgil Abloh(1980-2021) was a fashion designer and entrepreneur, and the artistic director of Louis Vuitton's men's wear collection from 2018 to 2021. He was also CEO of the Milan-based label Off-White, a fashion house he founded in 2013. Born in Rockford, Illinois, to Ghanaian parents, he entered the world of fashion with an internship at Fendi in 2009 alongside rapper Kanye West. The two began an artistic collaboration that would launch Abloh's career with the founding of Off-White. *Time* magazine named him one of the 100 most influential people in the world in 2018.

"[Seize the high ground is a] narrative history of the Army's aerospace experience from the 1950s to the present. The focus is on ballistic missile defense, from the early NIKE-HERCULES missile program through the SAFEGUARD acquisition site allowed by the 1972 ABM Treaty to the more advanced 'Star Wars' concepts studies toward the end of the century. [What is] covered is not only the technological response to the threat but the organizational and tactical development of the commands and units responsible for the defense mission"--CMH website.

"A true master class in the art of making the impossible possible." —Paul Polman One of the most vexing human rights issues of our time has been how to protect the rights of individuals and communities worldwide in an age of globalization and multinational business. Indeed, from Indonesian sweatshops to oil-based violence in Nigeria, the challenges of regulating harmful corporate practices in some of the world's most difficult regions long seemed insurmountable. Human rights groups and businesses were locked in a stalemate, unable to find common ground. In 2005, the United Nations appointed John Gerard Ruggie to the modest task of clarifying the main issues. Six years later, he had accomplished much more than that. Ruggie had developed his now-famous "Guiding Principles on Business and Human Rights," which provided a road map for ensuring responsible global corporate practices. The principles were unanimously endorsed by the UN and embraced and implemented by other international bodies, businesses, governments, workers' organizations, and human rights groups, keying a revolution in corporate social responsibility. *Just Business* tells the powerful story of how these landmark "Ruggie Rules" came to exist. Ruggie demonstrates how, to solve a seemingly unsolvable problem, he had to abandon many widespread and long-held understandings about the relationships between businesses, governments, rights, and law, and develop fresh ways of viewing the issues. He also takes us through the journey of assembling the right type of team, of witnessing the severity of the problem firsthand, and of pressing through the many obstacles such a daunting endeavor faced. *Just Business* is an illuminating inside look at one of the most important human rights developments of recent times. It is also an invaluable book for anyone wanting to learn how to navigate the tricky processes of global problem-solving and consensus-building and how to tackle big issues with ambition, pragmatism, perseverance, and creativity.

This collectible flip book "lookbook" features Virgil Abloh's unparalleled designs from his 2013 video showcasing his original brand, Pyrex Vision. Launched in time for a major exhibition of Virgil Abloh's work, this flip book shows images from the original video created to launch the sophomore Spring/Summer 2013 collection of Abloh's first brand, Pyrex Vision, entitled, "Youth Always Wins." Since he launched Pyrex Vision, Abloh has been translating his tools and techniques from his training as an architect and engineer into the fashion world and beyond. He eventually closed Pyrex Vision to open Off-White(TM), collaborating with brands like Nike, musicians, architects, and others. In addition to creating Off-White(TM), Abloh has worked with Kanye West, collaborated with Takashi Murakami, performed at Lollapalooza, started a furniture collection with IKEA, and more. In 2018, Abloh was named Men's Artistic Director at Louis Vuitton.

An analysis of the invasion of our personal lives by logo-promoting, powerful corporations combines muckraking journalism with contemporary memoir to discuss current consumer culture

True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

A pair of technology experts describe how humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use to

combine digital processing power with human ingenuity.

In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google, and their business practices to determine how their power affects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they are adequate to address market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies as well as from third parties—totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online—including on the free and diverse press, innovation, and privacy—and a final hearing to examine potential solutions to concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief Executive Officers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digital markets in anticompetitive and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether they believe they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices has revealed common problems

Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.
