Alex Davies tells the dramatic, colorful story of the quest to develop driverless cars—and the

File Type PDF Nissan Zd30 Engine Torque Settings

fierce competition between Google, Uber, and other companies in a race to revolutionize our lives. The self-driving car has been one of the most vaunted technological breakthroughs of recent years. But early promises that these

File Type PDF Nissan Zd30 Engine Torque Settings

autonomous vehicles would soon be on the roads have proven premature. Alex Davies follows the twists and turns of this story from its origins to today. The story starts with the Defense Advanced Research Projects Agency (DARPA), which was

File Type PDF Nissan Zd30 Engine Torque Settings

Charged with developing a land-based equivalent to the drone, a vehicle that could operate in war zones without risking human lives. DARPA issued a series of three "Grand Challenges" that attracted visionaries, many of them students and amateurs,

who took the technology from Jetsons-style fantasy to near-reality. The young stars of the Challenges soon connected with Silicon Valley giants Google and Uber, intent on delivering a new way of driving to the civilian world. Soon the automakers

File Type PDF Nissan Zd30 Engine Torque Settings

joined the quest, some on their own, others in partnership with the tech titans. But as road testing progressed, it became clear that the challenges of driving a car without human assistance were more formidable than anticipated. Davies profiles

File Type PDF Nissan Zd30 Engine Torque Settings

the industry's key players from the early enthusiasm of the DARPA days to their growing awareness that while this spin on artificial intelligence isn't yet ready for rush-hour traffic, driverless cars are poised to remake how the world moves.
