In September 2011, scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research, but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus (hereafter referred to as the H5N1 virus) that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the

Papers Question Paper
existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual-use life science arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual-use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives.

UPSC is considered to be the most prestigious and

Applications, notably in the development of chemical weapons. Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict, which could fuel a desire by certain States to retain and use existing chemical weapons, as well as increase State interest in creating new weapons; whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons. Stark indications of the multi-faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and

Download File PDF October November 2013 Biology

Syria, and also in more targeted chemical assassination operations in Malaysia and the UK. Using a multi-disciplinary approach, and drawing upon an international group of experts, this book analyses current and likely near-future advances in relevant science and technology, assessing the risks of their misuse. The book examines the current capabilities, limitations and failures of the existing international arms control and disarmament architecture - notably the Chemical Weapons Convention - in preventing the development and use of chemical weapons. Through

Download File PDF October November 2013 Biology

the employment of a novel Holistic Arms Control methodology, the authors also look beyond the bounds of such treaties, to explore the full range of international law, international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents, in order to develop recommendations for more effective routes to combat their proliferation and misuse. A particular emphasis is given to the roles that chemical and life scientists, health professionals and wider informed activist civil society can play in

Internationally acclaimed
Farmageddon, Dead Zone takes us on an eye-opening investigative journey across the globe, focussing on a dozen iconic species one-by-one and looking in each case at the role that industrial farming is playing in their plight. This is a passionate wake-up call for us all, laying bare the myths that prop up factory farming before exploring what we can do to save the planet with healthy food.

This volume examines emotions and emotional well-being from a rich variety of theological, philosophical and scientific and

Download File PDF October November 2013 Biology

therapeutic perspectives. To experience emotion is a part of being human; but what are emotions? How can theology, philosophy and the natural sciences unpack the nature and content of emotions? This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi, Italy. It brings together contributions from scholars of various academic backgrounds from around the world, whose individual insights are made all the richer by their juxtaposition with those from experts in other fields, leading to a unique exchange of ideas.

Download File PDF October November 2013 Biology Paper3 Question Paper

The Leading Edge of Early Childhood Education aims to support the effort to simultaneously scale up and improve the quality of early childhood education by bringing together relevant insights from emerging research to provide guidance for this critical, fledgling field. It reflects the growing recognition that early childhood experiences have a powerful effect on children's later academic achievement and long-term life outcomes. Editors Nonie K. Lesaux and Stephanie M. Jones bring together an impressive array of scholarly contributors.

Download File PDF October November 2013 Biology

Topics include: • creating learning environments that support children's cognitive and emotional development; • identifying and addressing early risk factors; • using data to guide educators' practice; and • capitalizing on the use of technology.

Recent years have seen a surge of local, state, and national initiatives aimed at expanding and improving early childhood initiatives, particularly regarding access to preK programs. The Leading Edge of Early Childhood Education promises to be a valuable resource for those charged with enacting the next level of work in this critical area.

Download File PDF October November 2013 Biology Paper3 Question Paper

Fisheries and aquaculture is a sector of special importance to food security, nutrition and livelihood in the Asia-Pacific Region, which can be significantly impacted by climate changes and related disaster risks. Effectively addressing climate change impacts and managing disaster risks in fisheries and aquaculture sector are vitally important to building resilience of the sector for sustained and greater contribution to Sustainable Development Goals (SDGs) related to ending hunger, poverty eradication and sustainable use of natural resources.

Download File PDF October November 2013 Biology

FAO member countries in the region have been making good effort and significant progress in addressing climate change impacts and related disaster risks with support of international communities. A FAO regional consultative workshop was convened to bring together a wide range of players including country governments, regional organizations and other partners to share their knowledge and good practices in addressing climate change implications for fisheries and aquaculture in the region, to assess the progress made in addressing issues with marine capture

Over the past two decades
bioscience facilities
worldwide have experienced
multiple safety and security
incidents, including many
notable incidents at so-
called "sophisticated
facilities" in North America
and Western Europe. This
demonstrates that a system
based solely on biosafety
levels and security
regulations may not be
sufficient. Setting the
stage for a substantively
different approach for
managing the risks of

Download File PDF October November 2013 Biology

Working with biological

agents in laboratories,
Laboratory Biorisk

Management: Biosafety and
Biosecurity introduces the
concept of biorisk

management—a new paradigm
that encompasses both
laboratory biosafety and
biosecurity. The book also
provides laboratory managers
and directors with the
information and technical
tools needed for its
implementation. The basis
for this new paradigm is a
three-pronged, multi-
disciplinary model of
assessment, mitigation, and
performance (the AMP model).
The application of the
methodologies, criteria, and

Download File PDF October November 2013 Biology

Guidance outlined in the book helps to reduce the risk of laboratories becoming the sources of infectious disease outbreaks. This is a valuable resource for those seeking to embrace and implement biorisk management systems in their facilities and operations, including the biological research, clinical diagnostic, and production/manufacturing communities.
