This book is a printed edition of the Special Issue "Systems Education for a Sustainable Planet" that was published in Systems

Beskriver svæveflyvning og navnlig svæveflytyper gennem tiderne.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Seven years of hitting the hard stuff have taken it out of PI Mike Hammer. That's how long it's been since he gave his beloved secretary the job from which she never returned. Now he's back with a vengeance. Velda is alive, if only he can reach her in time. But New York's toughest investigator still has friends in the right places. And his long-neglected .45 is definitely one of those. Piecing together the puzzling deaths of a senator, a newsagent and an FBI man, Hammer finds the missing link in a murderous network of international spies. One that turns out to be Spillane's kind of beauty - and who knows a good deal more than she should.

Systems Thinking, System Dynamics offers readers a comprehensive introduction to the growing field of systems thinking and dynamic modelling and its applications. The book provides a self-contained and unique blend of qualitative and quantitative tools, step-by-step methodology, numerous examples and mini-cases, as well as extensive real-life case studies. The content mix and presentation style make the otherwise technical tools of systems thinking and system dynamics accessible to a wide range of people. This book is intended as a text for students in diverse disciplines including business and management, as well as the social, environmental, health and applied sciences. It also has particular relevance for professionals from all backgrounds interested in understanding the dynamic behaviour of complex systems, change management, complex decision making, group problem solving and organisational learning. Systems thinking and system dynamics provide a scientific paradigm, a set of tools and computer technology which can help explain the forces and dynamics that underlie change and complexity in business, political, social, economic and environmental systems. Using systems thinking and system dynamics makes it possible to: examine and foresee the consequences of policy and strategic decisions implement fundamental solutions to chronic problems avoid mistakenly interpreting symptoms as causes test assumptions, hypotheses and scenarios boost staff morale and improve productivity improve the stability and performance of supply chains find long-term sustainable solutions and avoid "fire-fighting" behaviour.

The short; cryptic prophecies of St. Malachy; the Primate of Ireland; made circa 1140 while on a visit at Rome; about each Pope from his time till the End of Time--all based on visions he had at the time. From what we know of recent Popes; these prophecies are accurate; based on interior evidence alone. What is so very sobering is the fact there are only 2 Popes left after Pope John Paul III!

There are two sides to every coin, every story, and every person. No matter how hard you try to hide that second face away, you can never get rid of it. That's what one man is about to learn when his under-developed feminine side materializes into a very real, bubble gum-chewing bimbo and turns his world upside down!
