In July 1971, US National Security Advisor, Henry Kissinger, made a secret visit to China to meet top Chinese leaders. This inaugurated a new phase not just in US-China relations but in contemporary history. That visit and the subsequent US-China

ultimate challenge for the twenty-first century: how to build a shared international order in a world of divergent historical perspectives, violent conflict, proliferating technology, and ideological extremism. There has never been a true “world order,” Kissinger observes. For most of history,
