John Lewis Gaddis' acclaimed history of U.S. policy toward the Soviet Union during and immediately after World War II is now available with a new preface by the author. This book moves beyond the focus on economic considerations that was central to the work of New Left historians, examining the many other forces -- domestic politics, bureaucratic inertia, quirks of personality, and perceptions of Soviet intentions -- that influenced key decision makers in Washington, and in doing so seeks to analyze these determinants of policy in terms of their full diversity and relative significance.

Debating the Origins of the Cold War examines the coming of the Cold War through Americans' and Russians' contrasting perspectives and actions. In two engaging essays, the authors demonstrate that a huge gap existed between the democratic, capitalist, and global vision of the post-World War II peace that most Americans believed in and the dictatorial, xenophobic, and regional approach that characterized Soviet policies. The authors argue that repeated failures to find mutually acceptable solutions to concrete problems led to the rapid development of the Cold War, and they conclude that, given the respective concerns and perspectives of the time, both superpowers were largely justified in their courses of action.

It was forty-two years ago that Winston Churchill made his famous speech in Fulton, Missouri, in which he popularized the phrase "Iron Curtain." This speech, according to Fraser Harbutt, set forth the basic Western ideology of the coming East-West struggle. It was also a calculated move within, and a dramatic public definition of, the Truman administration's concurrent turn from accommodation to confrontation with the Soviet Union. It provoked a response from Stalin that goes far to explain the advent of the Cold War a few weeks later. This book is at once a fascinating biography of Winston Churchill as the leading protagonist of an Anglo-American political and military front against the Soviet Union and a penetrating re-examination of diplomatic relations between the United States, Great Britain, and the U.S.S.R. in the postwar years. Pointing out the Americocentric bias in most histories of this period, Harbutt shows that the Europeans played a more significant part in precipitating the Cold War than most people realize. He stresses that the same pattern of events that earlier led America belatedly into two world wars, namely the initial separation and then the sudden

coming together of the European and American political arenas, appeared here as well. From the combination of biographical and structural approaches, a new historical landscape emerges. The United States appears at times to be the rather passive object of competing Soviet and British maneuvers. The turning point came with the crisis of early 1946, which here receives its fullest analysis to date, when the Truman administration in a systematic but carefully veiled and still widely misunderstood reorientation of policy (in which Churchill figured prominently) led the Soviet Union into the political confrontation that brought on the Cold War.

This is the first major study of the role of industrial unions in the launch of the Cold War in the 1940s. Using unpublished archival material from Europe and America, Denis MacShane challenges existing interpretations of international labour's role in the Cold War, arguing that European traditions and political differences were more important than American interventions in determining labour's attitudes to international problems after 1945. Existing interpretations which focus on national confederations such as the TUC in Britain or the AFL in America treat the question of labour and the Cold War as a political and diplomatic quarrel. Dr. MacShane revises the view that the TUC shaped post-war trade union structures in West Germany, or that any TUC blueprint existed for German industrial trade unionism after 1945. In particular he examines trade unions in the engineering, steel, car, and metal industries who were at the peak of their power, size, and influence in 1945. Their productionist philosophy, which was powerfully tapped by the Marshall Plan, is examined to show why Leninist

and Stalinist forms of trade union organization were rejected after 1945. This book blends archival research, contemporary accounts, and interviews from Britain, the United States, France, Germany, and Switzerland to present a fascinating narrative of labour internationalism in the first half of the twentieth century, as well as a challenging thesis which will alter existing historical perceptions of the role of labour in the politically-charged years between 1945 and 1948 when the Cold War got under way.
