With many years of experience restoring fine artworks, photographs, watercolours and drawings, we are proud to have worked with many leading museums, galleries, exhibitors and art dealers across the UK and abroad.

~~Fine Art Restorers providing Restoration for Fine Art~~

The conservation and restoration of books, manuscripts, documents and ephemera is an activity dedicated to the preservation and protection of items of historical and personal value made primarily from paper, parchment, and leather. When applied to cultural heritage, conservation activities are generally undertaken by a conservator. The primary goal of conservation is to preserve the lifespan of the object as well as maintaining its integrity by keeping all additions reversible.

The European Research Centre for Book and Paper Conservation-Restoration was founded in March 2010. It was created on the initiative of the community of conservator-restorers, archivists, librarians and other professionals all over Europe, who saw an urgent need to foster research in book and paper conservation to be able to rescue the graphical and written heritage more efficiently.

Ever since its original publication in Germany in 1938, Max Schwiedler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw.* has been recognized as a seminal modern text on the conservation and restoration of works on paper. This volume, based on the authoritative revised German edition of 1950, makes

Schweidler's work available in English for the first time, in a meticulously edited and annotated scholarly edition. An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

This book is the seventh in the Readings in Conservation series, which gathers and publishes texts that have been influential in the development of thinking about the conservation of cultural heritage. The present volume provides a selection of more than ninety-five texts tracing the development of the conservation of works of art on paper. Comprehensive and thorough, the book relates how paper conservation has responded to the changing place of prints and drawings in society. The readings include a remarkable range of historical selections from texts such as Renaissance printmaker Ugo da Carpi's sixteenth-century petition to the Venetian senate on his invention of chiaroscuro, Thomas Churchyard's 1588 essay in verse "A Sparke of Frenship and Warne Goodwill," and Robert Bell's 1773 piece "Observations Relative to the Manufacture of Paper and Printed Books in the Province of Pennsylvania." These are complemented by influential writings by such figures as A. H. Munsell, Walter Benjamin, and Jacques Derrida, along with a generous representation of recent scholarship. Each reading is introduced by short remarks explaining the rationale for its selection and the principal matters covered, and the book is supplemented with a helpful bibliography. This volume is an indispensable tool for museum curators, conservators, and students and teachers of the conservation of works of art on paper.

This long awaited English edition of *Manuale per la conservazione e il restauro di disegni e stampe antichi* (1991) offers a clear and complete manual for the preservation and conservation of old master prints and drawings. The authors throw light on the

Read Online Paper Conservation And Restoration

historical and scientific backgrounds concerning the problems of restoration techniques of arts on paper, from 1150, when paper was first introduced in Europe, until the middle of the nineteenth century. The book is indispensable for anyone occupied with the study and conservation of old prints and drawings. This richly illustrated, first English edition is revised and brought fully up to date.

Every one of the Beatles' songs has been illustrated in style. Includes photography, illustration and artwork to accompany the full lyrics of each song.

Accompanying CD-ROM contains 257 full-color images corresponding to the 257 illustrations found in the printed edition, along with 2 short videos (11 min. and 6 min. in length, respectively) showing conservation techniques.

The 2nd edition of *The Care of Prints and Drawings* provides practical, straightforward advice to those responsible for the preservation of works on paper, ranging from curators, facility managers, conservators, registrars, collection care specialists, private collectors, artists, or students of museum studies, visual arts, art history, or conservation. A greater emphasis is placed on preventive conservation, a trend among collecting institutions, which reflects the growing recognition that scarce resources are best expended on preventing deterioration, rather than on less effective measures of reversing it.

"This celebrated book is a classic on the fine art and craft of restoring leather bookbinding. Middleton is one of Britain's pre-

Read Online Paper Conservation And Restoration

eminent practitioners and scholars on the subject. He writes with the rare insight of long practice and hard-won authority. Nowhere else can a student of this craft find clearer or more detailed explanations of the restorer's lore and science." "This is Middleton's fourth revised and expanded edition. This edition features a new, full-colour, identifying guide for leather and papers most likely found in bookbinding. The section on suppliers has been completely updated along with a comprehensive index." "This definitive work belongs on the shelf of every bibliophile, librarian, conservator, book restorer, and binder interested in this unique art form."--Rabat de la jaquette.
