Nonprofit organizations face fierce competition for funding, especially during times of financial crisis. In order to effectively further their goals and make a long-term impact in the communities they serve, these organizations must remain financially viable and sustainable. This book equips students training to become better nonprofit leaders with the information and conceptual frameworks needed to ensure their organizations are financially sustainable. Using practical tips and illustrative case examples, it guides the reader to an understanding of the structures and processes of nonprofit organizations, and includes detailed coverage of financial analysis, budget management, cash flow, financial accountability and reporting, investing, fundraising, and organizational growth. This book is ideal for students, faculty, and practitioners in social service administration, human service leadership, public and community health, public administration, organization management, and health care administration and management.

This comprehensive introduction to fundraising management provides a thorough grounding in the principles underpinning professional practice. Much more than a 'how-to' guide, the book critically examines the key issues in fundraising policy, planning and implementation, and introduces the most important management tools available to the modern fundraiser. Fully revised and updated, this new edition of Fundraising Management is packed with examples and case studies from around the world. It covers every important aspect of the fundraising process, including: Planning Donor recruitment and development Community fundraising Corporate fundraising Legacy fundraising Trust and foundation fundraising Legal and ethical frameworks for fundraising This groundbreaking text has been designed primarily to support students studying for the Certificate in Fundraising Management offered by the Institute of Fundraising, but is a useful text for all fundraising students and professionals.

A comprehensive text on how to develop, market, and sell your own product lines as independent labels or brands.

Strategic Management and Business Policy is the new dimension in the field of Management. Managers must aware of the business, types of business, policies, products, competitors, core resource, tactics for formulation of strategy, implementation and controlling policies in effective manner in an organization with out affecting and its policy, objectives, goals, mission and vision of an organization. It is vital for organisations to use company analysis to gain understanding of their limiting and enabling factors and strategic capabilities. Profits can then be maximised by selecting the most effective strategies, and through successful implementation of mergers, acquisitions and divestment opportunities. In this book Jenster and Hussey move away from the opinion based SWOT analysis commonly used, to provide a more objective step-by-step approach to objectively analysing an organisation. This important task is clearly explained, with information helpfully displayed in diagrams, and checklists of critical questions provided. In addition to the key, functional areas of management, corporate-wide approaches such as core competencies, critical success factors, industry analysis and the value chain are also examined. The book is illuminated with examples from the authors' own experiences, resulting in a practical and effective approach which will provide a foundation for corporate strategy and add a strategic dimension to a due diligence study - and so prove invaluable to MBA students and lecturers in strategic management. Every manager will be asked to participate in assessing strengths and weaknesses at some time in their career, and this book enables a considerable improvement to be made to many commonly used methods - and for those responsible for the development of strategies, it offers even more.

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

Thousands of students graduate from university each year. The lucky few have the rest of their lives mapped out in perfect detail - but for most things are not nearly so simple. Armed with your hard-earned degree the possibilities and career paths lying before you are limitless, and the number of choices you suddenly have to make can seem bewildering. Life After...Engineering and Built Environment has been written specifically to help students currently studying, or who have recently graduated, make informed choices about their future. It will be source of invaluable advice and wisdom to graduates on where their degree can take them, covering such topics as: Identifying a career path that interests you - and how to start pursuing it The worldwide opportunities open to engineering graduates Staying motivated and pursuing your goals Networking and self-promotion Making the transition from scholar to worker The Life After University series of books are more than simple 'career guides'. They are unique in taking a holistic approach to career advice - recognising the increasing view that, although a successful working life is vitally important, other factors can be just as essential to happiness and fulfilment. They are the indispensable handbooks for students considering their future direction.

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

This handbook was designed to provide up-to-date and practical guidance on national health planning and strategizing for health. It establishes a set of best practices to support strategic plans for health and represents the wealth of experience accumulated by WHO on national health policies, strategies, and plans (NHPSPs). WHO has been one of the leading organizations to support countries in the development of NHPSPs. The focus on improving plans has grown in recent years in recognition of the benefits of anchoring a strong national health sector in a written vision based on participation, analysis, and evidence.
