The work of the linguist Charles A. Ferguson spans more than three decades, and is remarkable for having been consistently at the forefront of scholarship on the relationship between language and society. This volume collects his most influential and seminal papers, each having expanded the parameters of sociolinguistics and the sociology of language. Taken together, they cover a wide range of topics and issues, and, more importantly, reflect the intellectual progress of a founder of the sociolinguistic field. The volume is divided thematically into four sections, and an introduction by Thom Huebner outlines the evolution of Ferguson's ideas and the impact they have had on other scholars. This book is essential reading for everyone interested in the field of sociolinguistics.

Most of the papers reproduced here have either been presented at a national or international conference, and some have been published elsewhere. I have obtained permission to republish because I think it is important to have them all together. The idea came to me when I was asked, during an interview, why I wrote on such different topics as part of my scholarship. The question was based on the different publications in which the person asking had found them. I had to explain that they are all on language and culture, two areas that are closely interrelated. It occurred to me that having all the papers published in one volume would help show how they relate to one another, and thereby provide a more meaningful dialogue on the general topic. I therefore hope that although each paper stands alone, use of cross-referencing will provide a cumulative effect that is impossible when the papers are read as separate publications. The last chapter is not a paper in the traditional sense, in that it is just a list of words. However, it adds to the readers understanding of the Kikuyu language. The semantic domains are a people groups way of understanding, categorizing and labeling the world around them. I hope it will be especially important as a source for future scholars who will want to analyze the culture and thought processes of their ancestors.

Dooley provides background information for each of the interviews, along with a thorough index.

An important interdisciplinary study, that establishes a general theory that accounts for the varieties of body language encountered in literary narrative, based on a general history of the phenomenon in the English language.

These essays express a common belief that the study of Romantic literature must be at once professionally serious and personally engaging. Topics discussed range from Wordsworth to Lady Caroline Lamb, and from Blake and Burke to the contemporary Irish poet Paul Muldoon. Each essay also offers close readings of essential works on English and Irish Romanticism. Introducing the collection is a tribute by the celebrated Romanticist Peter Manning.

Across readings of late sixteenth to mid-seventeenth century works, Kyle Pivetti argues that the writers of early modern England found in literary forms—including dumb shows, allegory, and rhyme—the means to construct national memory.
